INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Shareholders

BAC International Bank, Inc.

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of BAC International Bank, Inc. and Subsidiaries (the "Bank"), which comprise the consolidated statement of financial position as of December 31, 2022, the consolidated statements of profit or loss, and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Bank as of December 31, 2022, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Standards as issued by the International Accounting Standards Board (IFRS Standards).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Republic of Panama, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Key Audit Matter

Key audit matter is that matter that, in our professional judgment, was of the most significance in our audit of the consolidated financial statements of the current period. This matter was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Key Audit Matter

The allowance for loan losses at amortized cost is considered one of the most significant issues since its methodology requires the application of judgments and the use of assumptions for the construction of the expected credit loss ("ECL") model. The loan portfolio at amortized cost represents 65% of the Bank's total assets as of December 31, 2022 (2021: 64%).

The allowance for loan losses at amortized cost comprises the ECL as a result of the model of probability of default on loans according to the impairment stage assigned.

The ECL is determined according to the grouping of loans with similar credit risk characteristics. The methodologies applied by the model are comprised of estimates of the probability of default, loss given default, prospective analysis, and exposure at default. The assessment of whether or not a significant increase in the credit risk of loans has been presented entails the application of significant judgments in that model. This constitutes a challenge from an audit perspective due to the complexity of estimating the components used to perform these calculations and the application of the Bank's judgment.

How the matter was addressed in the audit

Our audit procedures included:

- Evaluation of key controls over delinquency calculations, internal customer risk ratings, review of the accuracy of customer information and methodologies, assumptions, and data used.
- Assessment of judgments applied by the Bank on assumptions regarding current economic conditions and forward-looking analysis considerations that may change the level of PCE, based on our experience and knowledge of the industry.
- For a sample of corporate loans, classified by type of activity or industry, and debtors with changes in risk classification based on quantitative and qualitative factors, the respective credit files were inspected, including the debtors' financial information supporting the credit operations and other publicly available information, and other factors that could represent a loss event, to determine the reasonableness of the assigned credit risk rating.
- The methodologies applied by the Bank in the ECL estimation model were assessed in accordance with IFRS 9 Financial Instruments, through the inspection of policies, manuals, and methodologies documented and approved by the Bank's corporate governance.
- An evaluation was made of the inputs used based on the corporate banking, consumer, and credit card methodologies and recalculation was performed according to the ECL estimation model for each of them.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Obtain sufficient appropriate audit evidence regarding the financial information of the entities
or business activities within the Bank to express an opinion on the consolidated financial
statements. We are responsible for the direction, supervision, and performance of the group
audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine that matter that was of most significance in the audit of the consolidated financial statements of the current period and is therefore the key audit matters. We describe this matter in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other legal information requirements

In compliance with Law 280 of December 30, 2021, which regulates the profession of certified public accountant in the Republic of Panama, we declare the following:

- That the direction, execution, and supervision of this audit work have been physically
 performed in the Panamanian territory for those entities or business activities within the group
 that perform operations that are perfected, consummated, or take effect within the Republic
 of Panama.
- The audit partner who has prepared this independent auditors' report is Ricardo A. Carvajal V.
- The audit work team that has participated in the audit of the Bank to which this report refers to, is formed by Ricardo A. Carvajal V., Partner; and Pedro Coché, Manager.

Notes to the Consolidated Financial Statements

December 31, 2022

(In U.S. dollars)

(1) Organization

BAC International Bank, Inc. was incorporated as a bank and holding bank on August 25, 1995, in Panama City, Republic of Panama. BAC International Bank, Inc. is owned in a 90.5339% by BAC International Corporation (BIC), 9.4622% by BAC Holding International Corp. (previously known as Leasing Bogota, S. A. Panama) and 0.0039% by other shareholders. BIC is an indirect subsidiary of BAC Holding International Corp. ("the Parent Company"), a company listed on the Colombian Stock Exchange ("BVC") and the Panama Stock Exchange ("Latinex"). These consolidated financial statements as of December 31, 2022, include the Bank and its subsidiaries.

As of December 31, 2021, the Company was wholly owned by Banco de Bogota, S.A., an authorized bank in the Republic of Colombia, which in turn is a subsidiary of Grupo Aval Acciones y Valores, S.A., an entity domiciled in the Republic of Colombia.

On March 25, 2022, Banco de Bogota S.A. carried out the spin-off of 75% of its ownership in the Company in favor of its shareholders of said entity, through Sociedad Beneficiaria Bogota, S.A.S.

On March 28, 2022, Grupo Aval Acciones y Valores, S.A. carried out the spin-off of 51.6% of the Company's shares in favor of its shareholders. The shares, spun off in favor of the shareholders of Grupo Aval, were received upon the completion of the spin-off held by Banco de Bogota, S.A. on March 25, 2022.

BAC International Bank, Inc. ("the Parent Bank") provides, directly and through its wholly owned subsidiaries (jointly, "the Bank"), a wide variety of financial services to individuals and institutions, principally in Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica and Panama

The Banking operations in the Republic of Panama are regulated and supervised by the Superintendency of Banks of the Republic of Panama, according to provisions established by Law Decree No. 52, dated April 30, 2008, that adopts the single text of Law Decree No.9 of February 26, 1998, as amended by Legislative Decree No.2 of February 22, 2008, which establishes the Banking regime of the Republic of Panama and creates the Superintendency of Banks and the rules that govern it.

(Panama, Republic of Panama)

(2) Basis of Preparation of the Consolidated Financial Statements

(a) Compliance with International Financial Reporting Standards ("IFRS")

The consolidated financial statements have been prepared in conformity with IFRSs issued by the International Accounting Standards Board ("IASB").

The consolidated financial statements were approved by the Bank's Board of Directors on February 23, 2023.

(b) Basis of measurement

The consolidated financial statements have been prepared on a historical cost basis, except for the following accounts in the consolidated statement of financial position.

- Investments at fair value; and
- Assets held for sale.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(2) Basis of Preparation of the Consolidated Financial Statements, continued

Initially, the Bank recognizes financial instruments at fair value on the date they are settled. Investments in securities are recorded when they are traded and loans at amortized cost when they are settled.

(c) Functional and presentation currency

The items included in the accounts of each of the Bank's subsidiaries are measured using the currency of the main economic environment where the entity operates ("functional currency").

The Bank's consolidated financial statements are presented in US dollars, which is also the Bank's functional currency. Information presented in US dollars is expressed in units, unless otherwise indicated.

(d) Use of estimates and judgments

Preparation of the consolidated financial statements requires the Bank's management to make judgments, estimates and assumptions affecting the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses. Final results may differ from these estimates. These also requires the Bank's management to apply its judgment when applying the Bank's accounting policies. The main judgments made by management in applying the Bank's accounting policies and the main sources of uncertainty in the estimates have been the same as those described in the last annual financial statements.

The information on the most significant areas of estimation of uncertainty and critical judgments in applying the accounting policies that have the most important effect on the amounts recognized in the consolidated financial statements is disclosed in Note 5.

(3) Summary of Significant Accounting Policies

The Bank has applied the policies to the consolidated financial statements in a manner consistent with those of the consolidated financial statements as of December 31, 2022, which are detailed below:

(a) Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Bank. The Bank controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

To determine the control, the potential voting rights that are currently executable or convertible are considered. The subsidiaries financial statements are included in the consolidated financial statements from the date on which the control begins, and until the control ceases.

Balances and Transactions Eliminated in the Consolidation

Intragroup transactions, balances, revenue and expenses in transactions between subsidiaries are eliminated. Losses and gains that arise from intragroup transactions that are recognized as assets or liabilities are also eliminated.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

Changes in the ownership of the subsidiaries that do not result in a change of control Transactions with non-controlling interest that do not result in a loss of control are accounted for as equity transactions; that is, as transactions with the owners. Any difference between the carrying value of the interest and the amount of the transaction is recorded as an adjustment to retained earnings.

Loss of control

When the Bank ceases to have control over a subsidiary, it derecognizes the assets and liabilities of the subsidiary, and any non-controlling interest and other components of equity. Any resulting gain or loss is recognized in profit or loss. Any retained interest in the former subsidiary is measured at fair value when control is lost.

(b) Foreign currencies

Assets and liabilities maintained in foreign currency are converted to the functional currency at the exchange rate in effect on the reporting date. Gains or losses resulting from the conversion of foreign currency are reflected in other revenues or other expense accounts in profit or loss. All non-monetary items of the Bank are recorded in the functional currency at the time of the transaction.

Goodwill and adjustments to the fair value resulting from the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and, consequently, are converted at the exchange rates in effect on each period closing date.

Subsidiaries of the Bank

The financial position and results of all of the Bank's subsidiaries that have a functional currency other then the Bank's functional currency are converted into the reporting currency as follows:

- Assets and liabilities: at the exchange rate at the period closing date.
- Revenues and expenses: at the average exchange rate of the period
- Equity accounts: at the historical exchange rate.

The resulting conversion adjustment is carried directly to a separate account in the "Equity" section, under "other comprehensive loss".

(c) Financial assets and liabilities

Financial assets are classified on the date of initial recognition, based on the nature and purpose of the financial asset's acquisition.

Classification

IFRS 9 contains three principal classification categories for financial assets: measured at amortized cost (AC), fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVPL). IFRS 9 classification is generally based on the business model in which a financial asset is managed and its contractual cash flows.

At initial recognition, financial assets are classified as measured at: AC, FVOCI or FVPL.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

A financial asset is measured at amortized cost and not at FVPL, if it meets both of the following conditions:

- 1. The asset is kept within a business model to collect contractual cash flows; and
- 2. The contractual terms of the financial asset establish specific dates for cash flows that represent solely payments of principal and interest on the outstanding balance.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and has not been designated at FVPL:

- 1. The asset is kept within a business model whose objective is achieved by collecting contractual cash flows and selling financial assets and;
- 2. The contractual terms of the financial asset establish specific dates for cash flows that represent solely payments of principal and interest on the current outstanding balance.

During the initial recognition of investments in equity instruments not held for trading, the Bank may elect to irrevocably recognized subsequent changes in fair value as part of other comprehensive profit and loss in equity. This election is made on an instrument by instrument basis.

All financial assets not classified as measured at AC or FVOCI as described above, are measured at FVPL.

In addition, in the initial recognition, the Bank may irrevocably designate a financial asset that meets the measurement requirements to be classified at AC or FVOCI to be measured at FVPL, if doing so eliminates or significantly reduces an accounting mismatch that may occur if not done. For now, the Bank do not use this option.

An embedded derivative where the main contract is a financial contract covered under IFRS 9 is not separated and instead the hybrid financial instrument is jointly assessed for classification.

Business Model Assessment

The Bank assess the objectives of the business models that hold the financial assets at portfolio level to better represent how each subsidiary manages the business and how management information is reported. The information considered includes:

- The policies and objectives stated for each portfolio of financial assets and the
 operation of these policies in practice. These include, whether management's strategy
 is to collect income from contractual interest; hold a profile of specific interest
 performance or coordinate the duration of the financial assets with the liabilities being
 financed or the expected outgoing cash or through cash flows from the sale of assets.
- How they are evaluated or reported to key management personnel of the Bank on portfolio performance.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

- The risks that affect the performance of the portfolios (and the financial assets held within them) and the way those risks are managed.
- How managers of the business are compensated (for example, whether compensation is based on the fair value of the assets managed or the contractual cash flows collected); and,
- The frequency, value and timing of sales in prior years, the reasons for those sales and expectations about future sales activity. However, the information on sales activity cannot be considered in isolation, but rather as part of an assessment of how Bank objectives established for managing financial assets are achieved and how cash flows are realized.

Financial assets held or managed for trading and where their performance is assessed on a fair value basis, are measured at FVPL because these are not held to cover contractual cash flows or to obtain contractual cash flows and to sell these financial assets.

Assessment of whether contractual cash flows are solely payments of principal and interest

For purposes of this assessment, "principal" is defined as the fair value of the financial asset at initial recognition. "Interest" is defined as compensation for the time value of money and credit risk associated with holding the current principal for a period of time and for other basic risks from loan agreements and other associated costs (e.g. liquidity risk and administrative costs), as well as the profit margin.

When evaluating whether contractual cash flows are solely payments of principal and interest, the Bank considered the contractual terms of the instrument. This includes an assessment to determine whether the financial asset contains a contractual term that could change the timing or amount of the contractual cash flows in such a way that it does not meet this condition. In making this assessment the Bank considers:

- Contingent events that will change the amount and timing of cash flows;
- Hedging conditions;
- Prepayment and extension terms;
- Terms that limit the Bank in obtaining cash flows from specific assets (e.g. unfunded asset agreements); and
- Terms that change the considerations on the value of money over time (e.g. periodic revision of interest rates).

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

Interest rates on certain consumer and business loans are based on variable interest rates established at the discretion of the Bank. Variable interest rates are generally established in accordance with the practices of each of the countries where the Bank operates, plus certain additional discretionary points. In these cases, the Bank assess whether the discretionary feature is consistent with the criteria of solely payments of principal and interest, considering several factors that include whether:

- Debtors can prepay the loans without significant penalties;
- Competitive market factors ensure that interest rates are consistent among banks; and,
- Any regulatory protective privision on behailf of customers in the country requiring banks to treat customers reasonably (e.g. regulated rates).

All fixed rate consumer and corporate loans contain a prepayment condition.

A prepayment feature is consistent with the criteria of solely payments of principal and interest, if the prepayment amount substantially represents unpaid amounts of principal and interest on the amount of outstanding principal, which may include fair compensation for early termination of the contract.

In addition, a prepayment feature is consistent with these criteria, if a financial asset is acquired or originates from a premium or discount to the contractual par amount and the prepayment amount substantially represents the contractual par amount, plus accrued, but unpaid, contractual interest (which may include fair compensation for early termination) and the fair value of the prepayment feature is insignificant in the initial recognition.

Impairment of Financial Assets

The Bank assesses the impairment of financial assets with an Expected Credit Losses model (ECL). This model requires the application of considerable judgment regarding how changes in economic factors impact ECL, which is determined on a weighted average basis.

The impairment model applies to the following financial assets that are not measured at FVPL.

- Fixed and variable rate debt instruments;
- Lease payments receivable;
- Other accounts receivable;
- Loan portfolio;
- Financial guarantee contracts issued; and
- Loans commitments issued.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

The Bank recognizes a provision for impairment of financial assets at AC and FVOCI in an amount equal to the expected credit losses in a period of twelve months after the end date of financial statements or during the remaining life of the loan. Expected losses during the remaining life of the loan are the losses expected from all possible impairment events during the expected life of the financial instrument, while expected losses in a twelve-month period are the portion of expected losses arising from impairment events resulting from impairment events that are possible during the twelve months following the date of the report.

Impairment requirements are complex and require estimated judgments and significant assumptions by management, particularly in the following areas:

- Assess whether the credit risk has increased significantly from initial recognition; and,
- Incorporate prospective information in the measurement of expected impairment losses.

Reserves for losses are recognized in an amount equal to the ECL during the life of the asset, except in the following cases, in which the amount recognized is equal to ECL for the 12 months following the measurement date:

- Investments in debt instruments determined to represent low credit risk at the reporting date; and,
- Other financial assets (other than short term accounts receivable) on which the credit risk has not increased significantly since initial recognition.

Measuring ECL

Expected credit losses (ECL) are the estimated weighted probability of credit losses measured as follows:

- Financial assets with no credit impairment at the reporting date: the present value of all contractual cash payments in arrears (for example: the difference between contractual cash flows owed to the Bank and cash flows that the Bank expects to receive);
- Impaired financial assets at the reporting date: the difference between the gross book value and the present value of estimated future cash flows;
- Outstanding loan commitments: the present value of the difference between contractual cash flows owed to the Bank in the event it enforces the commitment and cash flows that the Bank expects to receive; and
- Financially secured contracts: expected payments to reimburse the holder minus any amount the Bank expects to recover.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued Definition of impairment

The Bank considers a financial asset to be impaired when:

- It is highly unlikely that the debtor will fully pay its credit obligations to the Bank, without recourse for the Bank to take such actions as enforcing the guarantees (if any); or
- The debtor is more than 90-days past-due on any material credit obligation. Overdrafts are considered in arrears once the client has exceeded the established limit, or the established limit is less than the outstanding balance.
- For fixed income financial instruments, the following concepts, among others, are included:
 - Downgrade of the issuer's credit risk rating.
 - Contractual payments are not made on the due date or in the term period stipulated.
 - There is a virtual certainty of default.
 - Issuer is likely to go bankrupt or a bankruptcy petition is filed or similar action.
 - The financial asset stops trading in an active market given its financial difficulties.

To assess whether a debtor is impaired, the Bank considers indicators such as:

- Qualitative, e.g. noncompliance with contractual clauses;
- Quantitative, e.g. arrears or non-payment of another obligation from the same issuer to the Bank; and,
- Based on data developed internally and obtained from external sources.

Inputs used in the assessment of whether financial instruments are impaired, and their importance may vary over time to reflect changes in circumstances.

Significant increase in credit risk

Under IFRS 9, when determining whether the credit risk a financial asset has increased significantly since initial recognition, the Bank considers relevant fair and sustainable information available at no cost or disproportionate effort, including information and quantitative and qualitative analyses based on historical experience and expert assessment of Bank is credit risk, including prospective information.

The Bank identifies if a significant increase in the credit risk has occurred for each exposure by comparing:

- The probability of default (PD) during the remaining life a financial instrument at the closing date, with
- The PD during the remaining life at a point in time, which was estimated at initial recognition of exposure.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

The assessment of whether the credit risk has increased significantly from the initial recognition of a financial asset requires identification of the initial recognition date of the instrument. For purposes of revolving credit (credit cards, overdrafts, among others), the date when the credit was first delivered may be a long time ago. Changes in the contractual terms of a financial asset may also impact this assessment, as discussed below.

Rating by credit risk categories

The Bank assigns a credit risk grade to each exposure based on a variety of data that is determined to predict the PD, and applying the judgment of a credit expert, the Bank uses these grades to identify significant increases in credit risk. Credit risk grading is defined using qualitative and quantitative factors indicative of the risk of losses. These factors vary depending on the type of exposure and the type of borrower.

Credit risk rating is defined and calibrated so that the risk of losses increases exponentially as the credit risk is impaired and so that, for example, the difference in the risk of losses between grade satisfactory and special mention rating is less than the difference between the credit risk between special mention and sub-standard rating.

Each exposure is given a credit risk rating upon initial recognition based on information available on the debtor. Exposures are subject to continuous monitoring, that may result in displacement of exposure to another credit risk grade.

Determine if the credit risk has increased significantly

The Bank has established a general framework that incorporates quantitative information and qualitative to determine if the credit risk of a financial asset has significantly increased since its initial recognition.

The initial framework is aligned with the internal process of the Bank for credit risk management.

The criteria to determine whether the credit risk has increased significantly varies by portfolio and includes limits based on defaults.

The Bank assesses whether the credit risk of a particular exposure has increased significantly since initial recognition if, based on Bank qualitative modeling, the expected probability of impairment during the remaining life will increase significantly from initial recognition. In determining the credit risk increase, the expected impairment losses in the remaining life are adjusted by changes in maturity terms.

Under certain circumstances, using the judgment of credit experts, and based on relevant historical information, the Bank determines that an exposure has had a significant increase in credit risk, if particular qualitative factors indicate this and those factors may not be completely captured by periodic quantitative analyses. As a limit, the Bank assumes that a significant credit risk occurs no later than when the asset is in arrears for more than 30 days.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

The Bank monitors the effectiveness of the criteria used to identify significant increases in credit risk based on regular reviews to confirm that:

- The criteria can identify significant increases in credit risk before an exposure becomes impaired.
- The criteria are inconsistent with the time when the asset is more than 30 days past due

Modified financial assets and liabilities

Financial assets

If the terms of a financial asset are modified, the Bank assesses whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to the cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is written off and a new financial asset is recognized at its fair value plus any eligible transaction costs. Commissions received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent the reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other commissions are included in profit or loss for the year as part of the gain or loss on account derecognition.

If cash flows are modified when the debtor is in financial difficulties, then the objective of the modification is usually to maximize collection opportunities and minimize default risk. Under the Bank's renegotiation policies, customers in financial difficulties are granted concessions that generally correspond to reductions in interest rates, an extension of payment terms, reductions in balances owed, or a combination of the above.

If the Bank plans to modify a financial asset in a way that would result in the condonation of cash flows, then it first considers whether a portion of the asset should be derecognized before the modification takes place. This approach impacts the outcome of the quantitative assessment and means that the derecognition criteria are often not met in such cases.

If the modification of a financial asset measured at AC or FVOCI does not result in derecognition of the financial asset, then the Bank first recalculates the gross carrying amount of the financial asset using the asset's original effective interest rate and recognizes the resulting adjustment as a gain or loss in profit or loss. For variable interest rate financial assets, the original effective interest rate used to calculate the modified gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and modification fees received adjust the gross carrying amount of the modified financial asset and are amortized over the remaining term of the modified financial asset.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

If such modification is carried out due to financial difficulties of the debtor, then the gain or loss is presented along with impairment losses. In other cases, it is presented as interest income calculated using the effective interest rate method.

The contractual terms of the loans may be modified for several reasons, including changes in market conditions, client retention and other factors unrelated to the actual or potential impairment of the client's loan.

When the terms of a financial asset are modified and the modification does not result in the removal of the asset from the consolidated statement of financial position, the determination of whether the credit risk has significantly increased reflects comparisons of:

- The PD during the remaining life on the date of the balance sheet based on the terms modified with;
- The PD on the estimated remaining life based on the date of initial recognition and the original contractual terms.

For financial assets modified as part of the Bank's renegotiation policies, the estimation of the PD reflects whether the modifications have improved or restored the ability of the Bank to collect principal and interest and the prior experience of the Bank in similar actions. As part of the process, the Bank assesses the debtor's payment compliance as compared to the modified terms of the debt debtor or and considers several performance indicators for the group of debtors modified.

Generally, restructuring indicators are a relevant factor in increased credit risk. Therefore, a restructured debtor must demonstrate consistent payment behavior over a period of time before no longer being considered as an impaired loan or that the PD has decreased in such a way that the provision may be reversed, and the loan may be measured for impairment over a term of twelve months after the closing date of the report.

Financial liabilities

The Bank derecognizes a financial liability when its conditions are modified, and the cash flows of the modified obligation are substantially different. In this case, a new financial liability based on the modified terms is recognized at its fair value. The difference between the carrying amount of the derecognized financial liability and the consideration paid is recognized in profit or loss. The consideration paid includes the transferred of non-financial assets, if any, and the assumption of liabilities, including the new modified financial liability.

If the modification of a financial liability is not recorded as derecognition, then the amortized value of the liability is recalculated by discounting the modified cash flows at the original effective interest rate, and the resulting gain or loss is recognized in profit or loss. For variable interest rate financial liabilities, the original effective interest rate used to calculate the modified gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognized as an adjustment to the book value of the liability and are amortized over the remaining term of the modified financial liability by recalculating the effective interest rate on the instrument.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued Inputs in Measuring ECL

Key inputs in measuring ECL are usually the structure of terms of the following variables:

- Probability of default (PD).
- Losses given default (LGD).
- Exposure at default (EAD).

The foregoing parameters are derived from internal statistical models and other historical information. These models are adjusted to reflect prospective information as described below.

Credit risk ratings are a grouping criteria to determine the PD term structure for the different exposures. The Bank obtains information on the number of defaults on credit risk exposures analyzed by jurisdiction or region, type of product, and the credit risk rating assigned to calculate the PD.

The Bank uses statistical models to analyze the data collected and generates estimates of the probability of impairment in the remaining life of the exposures and how those probabilities of impairment will change as a result of the passage of time.

This analysis includes the identification and calibration of relationships between changes in impairment rates and key macroeconomic factors as well as an in-depth analysis of certain credit risk factors (e.g. loan write-offs). For most loans, key economic factors usually include gross domestic product growth, changes in market interest rates, and unemployment.

PDs are estimated on certain cut-off dates. They are calculated using survival models, based on historical default vectors. If a counterparty or exposure migrates between the different ratings, then this will cause a change in the estimated PD for that group. The PDs are estimated considering the contractual maturity terms of the exposures and the estimated prepayment rates.

The historical PD is then transformed to a prospective PD, using macroeconomic sensitivity models.

LGD is the magnitude of probable losses in the event of non-compliance. The Bank estimates the parameters of the LGD based on historical loss recovery rates against the noncomplying parties. LGD models consider the structure, collateral, and the recovery costs of any collateral when there are mortgage guarantees.

For unsecured loans, a cash to value recovery model is used. For loans secured by mortgages and/or pledges, a history of the relationship between the selling price of assets available for sale and sold with respect to the balance of the loans is used as a recovery parameter. These loans are calculated on the bases of discounted cash flows using the effective interest rate of the loan.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

EAD represents expected exposure in the event of non-compliance. The Bank derives the EAD from the current exposure of the counterpart and potential changes in the current amount permitted under the terms of the contract, including amortization and prepayments for decreasing and revolving exposures with no commitment to disburse. For loan commitments and financial guarantees, the EAD considers the amount disbursed, as well as potential future amounts that may be disbursed or collected under the contract, which are estimated based on historical observations. Finally, for credit cards, due to their relative nature, the Bank determines the EAD by modeling a percentage of historical utilization over the approved credit limit.

The Bank measures the EAD considering the risk of noncompliance during the maximum contractual period (including options to extend the customer's debt) on which there is an exposure to credit risk, even if, for purposes of risk management, the Bank considers a longer period of time. The maximum contractual period is extended to the date on which the Bank has the right to require repayment of a loan or terminate a loan commitment or security guarantee granted.

For credit card balances the Bank measures EADs over a longer period than the maximum contractual period if the contractual ability of the Bank to demand payments does not limit the Bank's exposure to credit losses for the contractual period. These facilities do not have a fixed term or a collection structure and are managed on a collective basis. The Bank may cancel them immediately, but this contractual right is forced in the normal management of the Bank's day to day management, rather than only when the Bank finds that there has been an increase in credit risk for each loan. This longer period will be estimated considering the actions for credit risk management that the Bank expects to take and that mitigate the EAD. These measures include a reduction in limits and cancellation of loan contracts.

Where parameter modeling is performed on a collective basis, the financial instruments are pooled on the basis of shared risk characteristics that include:

- Type of instrument.
- Credit risk rating.
- Guarantees.
- Date of initial recognition.
- Remaining term until maturity.
- Geographical location of the debtor.

The above pooling is subject to regular review to ensure that the exposure of a particular group remains homogeneous.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued Projection of future conditions

Semi-annually forecasted, macroeconomic scenarios for twelve months are approved for the six countries where the Bank operates, and they are divided into three categories: upside, central and downside. These scenarios are prepared based on the Bank's macroeconomic simulation model and are complemented by (i) projections from supranational organizations such as the International Monetary Fund, the World Bank, and Economic Commission for Latin America and the Caribbean, etc. (ii) the macroeconomic program of the Central American central banks and (iii) economists outside the Bank.

- <u>Central scenario</u>: According to current expectations, it contemplates stability in the
 nominal macroeconomic variables, exchange rate, interest rates, and inflation.
 Forecasts from other organizations that carry out economic research are used as a
 reference, for example, the International Monetary Fund, the World Bank and the
 central banks of each country. External references bring fairness to the exercise.
- Upside and downside scenarios: These are the probable macroeconomic scenarios before the realization of some of the main risks associated with each country. They are categorized as upside and downside risks, furthermore, divided between internal and external risks.
- External Risks: The Central American countries, being small and open economies, are exposed to the economic performance of the large economies and main trading partners, mainly the United States and Europe. The economic activity of these countries affects the Central American countries in a generalized way, mainly through income from remittances, exports, tourism, and foreign direct investment.
- <u>Internal Risks:</u> These are risks specific to each country. They include risks associated with the internal social, political, and economic situation. In the current situation, the risks associated with the performance of governments predominate public finance management, natural disasters, health policies, etc.

The external information includes economic data and publication of projections by government committees, monetary authorities (mainly in the countries where the Bank operates), supranational organizations (such as the Organization for Economic Cooperation and Development, the International Monetary Fund and others), academic projections, private sector, and credit risk rating agencies.

The base case represents the most probable. Other scenarios represent a more optimistic or pessimistic outcome. In addition, the Bank uses periodic stress testing to calibrate the determination of these other representative scenarios.

Financial liabilities

Financial liabilities are measured at amortized cost using the effective interest method, except when there are financial liabilities measured at FVPL.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued Recognition, disposal and measurement

The Bank regularly recognizes the purchase or sale of financial instruments on the date of each negotiation, which is the date on which the Bank commits to buy or sell a financial instrument. Financial assets and liabilities are initially recognized at fair value.

Transaction costs are attributed to expenses in the consolidated statement of profit or loss when incurred for financial assets and liabilities at fair value with changes in the profit or loss, and they are recorded as part of the initial value of the instrument for assets and liabilities at amortized cost and available for sale securities. Transaction costs are incremental costs incurred to acquire assets or sell financial liabilities. These include fees, commissions and other concepts paid to agents, brokers, advisors and intermediaries, rates established by regulatory agencies and stock markets, as well as taxes and other rights.

Financial assets are derecognized from the consolidated statement of financial position when the payments derived from then are received, the rights to receive cash flows from the investments have expired or have been transferred and the Bank has transferred substantially all of the risks and benefits derived from their ownership.

After initial recognition, all financial assets and financial liabilities classified at amortized cost are measured based on the amortized cost method. Accrued interest is recorded in the interest income or expense account.

The Bank writes off a financial liability when its contractual obligations have been paid or canceled or have expired.

Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

Presentation of provision for PCE in the consolidated statement of position

The provision for PCE is presented in the consolidated statement of financial position as follows:

- Financial assets measured at amortized cost: as a deduction from gross carrying value of the assets;
- Loan commitments and financial guarantee contracts: generally, as a provision; and
- Debt instruments measured at FVOCI: no provision is recognized for losses in the
 consolidated statement of financial position because the carrying amount of these
 assets is their fair value. However, the provision for losses is disclosed and
 recognized in other comprehensive income.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

(d) Assets held for sale

Assets acquired or awarded in the settlement of a loan are held for sale and are initially recognized at the lower of the balance of the loan and fair value less selling costs as of the award date, establishing a new cost basis. After the award, management conducts periodic assessments and assets are recognized at the lower of carrying value or fair value less costs to sell. Operating revenues and expenses originated and changes in the provision for the valuation of those assets are included in other operating expenses. Costs related to the maintenance of these properties are included as expenses when incurred.

(e) Recognition of the most significant income and expenses

Interest income and expenses

Interest income and expenses are recognized in profit or loss using the effective interest method. The effective interest rate is the discount rate that equals exactly the estimated cash flows receivable or payable throughout the expected life of the financial instrument or when appropriate (in a shorter period) with the net carrying value of the financial asset or liability. To calculate the effective interest rate, the Bank will estimate cash flows considering all of the contractual conditions of the financial instrument, but not considering future credit losses.

The calculation of the effective interest rate includes all commissions and points paid or received that are part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

Fees and commissions

Fees and commissions that are part of the effective interest rate in a financial asset or liability instrument are included in the measurement of the effective interest rate.

Other revenues from fees and commissions, including services fees, asset management, sales commissions, loan syndication, among others, are recognized when the corresponding services are provided.

Annual credit card memberships, net of direct card-origination incremental costs, are deferred and amortized by applying the straight-line method during a term of one year. Commissions charged to affiliated commercial establishments are determined based on the amount and type of purchase by the cardholder and are recognized when invoiced.

Other fees and commissions received mainly relating to fees for transactions and services are recognized as income when they are received, and related services have been rendered.

Loyalty programs

The Bank offers loyalty programs that allow cardholders to earn points that can be redeemed for a variety of awards, including cash, trips and products at a discount. The points are recognized as a separately identifiable component of the initial transaction of credit card consumption income.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

The estimated fair value of loyalty programs and those points redeemed are recognized in the commissions account in profit or loss. The Bank recognizes the points based on the earned points expected to be redeemed and the fair value of the

point to be redeemed. The points to be redeemed are estimated based on the history of redemption, card product type, account transaction activity and past performance of the cards.

(f) Cash and cash equivalents

The Bank considers all highly liquid time deposits with maturities of 90 days or less as cash equivalents. Cash and cash equivalents consist of cash, demand deposits at banks, and certain securities and deposits that generate interests, with original maturities of 90 days or less.

(g) Property and equipment

Property and equipment are presented at cost, less accumulated depreciation and any accumulated impairment losses amortization.

The cost of renewals and improvements is capitalized when they increase the asset's useful life; while repairs and maintenance that do not extend the useful life or improve the asset are charged to profit or loss during the period in which they are incurred.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets. The Bank recognizes depreciation in profit or loss with an increase to the accumulated depreciation account. Land is not depreciated. The estimated useful lives of assets are:

| <u>Category</u> | <u>Years/Base</u> |
|-------------------------|-------------------|
| Buildings | 20 - 50 |
| Furniture and equipment | 5 - 10 |
| Vehicles | 5 |
| Computer's equipment | 3 - 5 |
| Leasehold improvements | 3 - 10 |
| | |

Leasehold improvements are amortized during the lower of the estimated useful life or the term of the lease contract.

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The carrying amount of an asset is immediately reduced to its recoverable value if the carrying amount of the asset is greater than the estimated recoverable value. The recoverable amount is the highest between the fair value of the asset less the cost of selling and its value in use.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

(h) Leases

At the inception of a contract, the Bank assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Bank assesses whether:

- the contract involves the use of an identified asset this may be specified explicitly
 or implicitly and should be physically distinct or represent substantially all of the
 capacity of a physically distinct asset. If the supplier has a substantive substitution
 right, then the asset is not identified;
- The Bank has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period of use; and
- The Bank has the right to direct the use of the asset. The Bank has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Bank has the right to direct the use of the asset if either:
 - The Bank has the right to operate the asset; or
 - The Bank designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on a reassessment of a contract that contains a lease component, the Bank allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Bank has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

i. As a lessee

The Bank recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Bank's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Bank is reasonably certain to exercise, lease payments in an optional renewal period if the Bank is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Bank is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Bank's estimate of the amount expected to be payable under a residual value guarantee, or if the Bank changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Bank presents right-of-use assets that do not meet the definition of investment property in "property, furniture, equipment and improvements" and lease liabilities in "lease liabilities" in the consolidated statement of financial position.

Short-term leases and leases of low-value assets

The Bank has elected not to recognize right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less and leases of low-value assets, including IT equipment. The Bank recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

ii. As a lessor

When the Bank acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

To classify each lease, the Bank makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Bank considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

If an arrangement contains lease and non-lease components, the Bank applies IFRS 15 to allocate the consideration in the contract.

The Bank recognizes lease payments received under operating leases as income on a straight-line basis over the lease term as part of "other income".

(i) Business combinations and goodwill

The Bank accounts for business combinations using the acquisition method when control is transferred. The consideration transferred in the acquisition is generally measured at fair value as are the identifiable net assets acquired. Any goodwill is subject to annual impairment tests. Any gain from purchase under very advantageous conditions is immediately recognized in profit or loss. Transaction costs are recorded as an expense when incurred, except if they are related to the issuance of debt or equity instruments.

Any contingent consideration is measured at fair value at the acquisition date. If an obligation to pay the contingent consideration that meets the definition of financial instruments is classified as equity, it should not be measured again, and its subsequent settlement should be accounted for within equity. If not, the other contingent consideration is remeasured at fair value on each reporting date and subsequent changes in the fair value of the contingent consideration are recognized in profit or loss.

Non-controlling interests are recorded for the proportional part of the fair value of the identifiable assets and liabilities, unless stated otherwise. When the Bank has the corresponding option to settle the purchase of a non-controlling interest through the issue of its own ordinary shares, no financial liability is recorded.

During the measurement period (which is a term of one year from the date of the acquisition), the Bank can, retrospectively, adjust the amounts recognized on the date of acquisition to reflect new information obtained on events and circumstances that existed at that date.

For impairment tests purposes, goodwill acquired in a business combination is, on the acquisition date, assigned to each of the cash-generating unit groups (CGUs) expected to benefit from the combination. The CGUs to which goodwill is assigned will be disaggregated so impairment-testing level reflects the lowest level to which the goodwill is controlled for purposes of internal management.

An impairment loss will be recognized if the carrying amount of the CGU plus the goodwill allocated to it is higher than its recoverable amount, in which case the allocated goodwill will be reduced, and any remaining impairment would be applied to other CGUs' assets.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

(j) Intangible assets

Intangible assets represent identifiable non-monetary assets and are acquired separately or through a business combination or are generated internally. The Bank's intangible assets are recognized at cost or at fair value and are mainly comprised of relations with the depositors, relations with credit card customers, relations with affiliated businesses, technological programs and trade names.

Cash-generating units to which goodwill has been attributed are periodically assessed for impairment. This assessment is carried out at least annually, or whenever there is evidence of impairment.

The amortization expense of intangible assets is presented in profit or loss as depreciation and amortization expenses.

Trade names are non-amortizable intangible assets.

(k) Income tax

Tax expense for the year includes current and deferred taxes. Taxes are recognized in profit or loss, except to the extent that they refer to items recognized directly in equity.

The current tax expense is calculated based on the laws enacted on the reporting date in the countries where the parent company and its subsidiaries operate, and where they generate positive taxable bases. The Bank's management periodically assesses the positions assumed in tax returns regarding situations in which applicable tax regulation is subject to interpretation, and when necessary, recognizes provisions for the amounts expected to be paid to the tax authorities.

Deferred taxes are recognized for the temporary differences that arise between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recorded if they arise from the initial recognition of goodwill; deferred taxes are not recognized if they arise from an asset or liability in a transaction, other than a business combination, that at the time of the transaction does not affect profit or loss nor taxable income or loss. Deferred tax is determined using tax rates (and laws) enacted or substantially enacted on the reporting date and expected to be applicable when the corresponding deferred tax asset is realized, or the liability is settled.

Deferred tax assets are recognized only to the extent that it is probable that future tax benefits will be available with which to offset the temporary differences. Deferred taxes are recognized over temporary differences that arise from investments in subsidiaries and associates, except for those deferred tax liabilities for which the Bank can control the date on which the temporary differences will be reversed, and it is likely that they will not be reversed in the near future. Deferred tax assets are recognized in deductible temporary differences that arise from investments in subsidiaries only to the extent that the temporary differences will likely be reversed in the future, and there is a sufficient future taxable income against which the temporary differences can be used.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

Deferred tax assets and deferred tax liabilities are set off only if there is a legally recognized right to offset the current tax assets with the current tax liabilities and when the deferred tax assets and deferred tax liabilities are derived from income tax corresponding to the same tax authority, and the authority allows the Bank to pay or received a single amount that settle the existing net balance.

(I) Employee benefits

The Bank is subject to the labor laws in each country where it operates. The Bank provisioned an employment benefit when such benefit is related to employee services already rendered, the employee has earned the right to receive the benefit, the benefit payment is probable, and the amount of such benefit can be estimated.

(m) Trust contracts and securities management

The assets under trust contracts and securities under custody are not considered part of the Bank, and accordingly, such securities and related revenue are not included in these consolidated financial statements. It is the obligation of the Bank to manage and safeguard the assets under contract and independently of their equity.

The Bank charges a fee for the management of trust contracts and custody of securities, which is paid according to agreements between the parties. These fees are recognized as income according to the terms of the contracts either monthly, quarterly or annually on an accrual base.

(n) Fair value estimates

The fair value of a financial asset or liability is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price).

The different hierarchy levels have been defined as follows:

- Level 1 Quoted prices in active markets without adjustments for identical assets or liabilities that the Bank can access at the measurement date.
- Level 2 Inputs other than quoted prices included in Level 1 that are observable, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are not active and other valuation techniques where significant data inputs are directly or indirectly observable in the market.
- Level 3 Unobservable inputs for the asset or liability. This category includes all
 instruments where the valuation technique includes unobservable inputs and these
 have a significant effect on the fair value measurement. This category also includes
 instruments that are valued based on quoted prices for similar instruments for which
 we must make significant adjustments using unobservable inputs, assumptions or
 adjustments in which no observable or subjective data are used when there are
 differences between the instruments.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

A market is considered active if quoted prices are readily and regularly available from an exchange, financial intermediaries, a sector institution, pricing service or regulatory agency, and those prices reflect actual market transactions with sufficient frequency and volume to provide market pricing information.

(o) Transactions between entities under common control

Transfers of assets between entities under common control, including transactions with intermediate holding companies, are initially recorded at book value of the Bank transferring the assets at the date of transfer. If the carrying amount of the assets and liabilities transferred differs from the historical cost of the Parent Company of entities under common control, then the Bank receiving the assets and liabilities will recognize them at the historical cost of the parent bank.

The Bank enters into transactions with related parties, which according to the internal policies of the Bank are carried out at market conditions.

(p) New International Financial Reporting Standards ("IFRSs") not yet adopted.

A number of new standards and amendments to standards are effective for annual periods beginning January 1, 2023, and early application is permitted; however, the Bank has not early adopted the new and modified standards when preparing the consolidated financial statements as of December 31, 2022.

The following new and amended standards are not expected to have a significant impact on the Bank's consolidated financial statements:

- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).
- Classification of Liabilities as Current or Non-current (Amendments to IAS 1)
- IFRS 17 Insurance Contracts and amendments to IFRS 17 Insurance Contracts.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).
- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16).

(q) Segment Reporting

An operating segment corresponds to the group of entities that make up the banking operation in each of the countries in which the Bank operates. Each operating segment is engaged in business activities from which it may earn income and incur expenses, including income and expenses related to transactions with any of the other components of the Bank. The operating results of each segment are periodically reviewed by the Management to make decisions on the resources to be assigned to the segment and evaluate its performance. The results of the segments that are reported to the Administration include elements that are directly attributable to each segment.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(3) Summary of Significant Accounting Policies, continued

(r) Reclassifications and non-material corrections

Non-material amounts in the consolidated financial statement of 2021 were reclassified to align with the presentation of the consolidated financial statement of 2022. The Bank has identified non-material corrections that have been included in the consolidated statement of cash flows for the year ended December 31, 2021.

The following table shows a description of the non-material corrections identified:

| | 2021 | | | |
|---|---------------|--------------|---------------------|--|
| | Amount | Correction | As <u>amount</u> | |
| Operating activities Other passives | 109,264,691 | (15,653,284) | 93,611,407 | |
| Financial activities Payment of financial leases | 12,952,405 | (38,198,462) | (25,246,057) | |
| Effect of exchange rate fluctuations on cash held | (101,016,180) | 53,851,746 | (47,164,434) | |

These reclassifications and corrections did not change the total assets, liabilities, equity or results of the respective year.

(4) Risk Management

Risk management is a fundamental part of the Bank. It has an infrastructure to comprehensively manage risks, in order to ensure a responsible and sustainable growth in time, to maintain the confidence of its stakeholders, and to assure with reasonable certainty the fulfillment of its short, medium and long-term goals, through a balance between meeting objectives and taking risks, in line with the corporate strategy.

Classification of financial assets

See the classification under IFRS 9 in accounting policies in Note 3 (c).

The following table provides a reconciliation between line items in the consolidated statement of financial position and categories of financial instruments.

| 2022 | Designated FVPL – debt instruments | Designated FVPL - equity <u>instruments</u> | FVOCI - debt instruments | FVOCI - equity <u>instruments</u> | <u>AC</u> | <u>Total</u> |
|--|------------------------------------|---|-----------------------------|---|--------------------------------------|--|
| Cash, cash equivalents and deposits in banks investments in securities | 0 27.877.482 | 0 13.078.802 | 0 4.102.738.448 | 0 3.175.100 | 5,203,957,213 43.561.300 | 5,203,957,213 4,190,431,132 |
| Loans at amortized costs | 0 | 13,070,002 | 1,102,730,440 | 0,175,100 | 20.131.278.641 | 20.131.278.641 |
| Other accounts receivable | 0 | 0 | 0 | 0 | 378,338,672 | 378,338,672 |
| Total financial assets | 27,877,482 | 13,078,802 | 4,102,738,448 | 3,175,100 | 25,757,135,826 | 29,904,005,658 |
| | | | | | | |
| ••• | Designated FVPL – debt | Designated FVPL | FVOCI - debt | FVOCI - equity | | |
| 2021 | | • | FVOCI - debt instruments | | <u>AC</u> | <u>Total</u> |
| 2021 Cash, cash equivalents and deposits in banks | FVPL - debt | - equity | | equity | <u>AC</u> 5,214,338.632 | <u>Total</u> 5,214,338,632 |
| | FVPL - debt | - equity | | equity instruments | · <u>—</u> | |
| Cash, cash equivalents and deposits in banks | FVPL – debt instruments | - equity instruments | instruments 0 | equity instruments | 5,214,338.632 0 18,018,549,655 | 5,214,338,632 3,513,667,154 18,018,549,655 |
| Cash, cash equivalents and deposits in banks Investments in securities | FVPL – debt instruments | - equity instruments | instruments 0 | equity instruments 0 3,084,768 | 5,214,338.632 0 | 5,214,338,632 3,513,667,154 |

As of December 31, 2022, and 2021, all of the financial liabilities held by the Bank are classified at amortized cost.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The Bank is exposed to the following risks from financial instruments:

- Credit risk.
- Liquidity risk,
- Market risk and
- Operational risk.

For the management of these risks, an organizational framework based on current regulations in the region on risk management has been defined. This framework includes policies, procedures and a human and technical infrastructure to identify, analyze and assess risks, as well as to set adequate limits and controls, monitor risk management and comply with defined limits. These policies and risk management systems are periodically reviewed, updated and reported to the respective committees, to ensure they reflect changes in market conditions, products and services offered.

Through its management procedures and standards, the Bank aims to develop a disciplined and constructive control environment where all employees understand their roles and duties.

The periodic oversight and management of risks is conducted through the following corporate governance bodies, established both regionally and in the countries where the Bank operates: Committee of Comprehensive Risk Management, Assets and Liabilities Committee (ALICO), Compliance Committee, Credit Committee, and Audit Committee.

(a) Credit Risk

This is the risk of financial loss faced by the Bank when a client or counterparty fails to meet their contractual obligations, and is mainly originated from deposits, investments in securities and loans receivable.

To mitigate credit risk, risk management policies establish processes and controls to follow for the approval of loans or credit facilities. The Bank structures acceptable credit risk levels by setting limits on the amount of risk that is assumed in relation to one borrower, or group of borrowers, and geographic segment. These credits are constantly controlled and subject to periodic review.

Exposure to credit risk is managed through periodic analysis of the borrowers' or potential borrowers' capacity to pay principal and interest. Exposure to credit risk is also mitigated in part through collateral, corporate and personal guarantees.

Credit is managed through policies that have been clearly defined by the Board of Directors and are reviewed and modified periodically based on changes and expectations in the market where the Bank operates, regulations and other factors considered while preparing these policies.

The Bank uses a series of credit reports to assess its portfolio's performance, and provision requirements and specially to anticipate events that could affect its debtor's condition in the future.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The Bank has a regional guideline on investments that defines the general profile for the investment portfolio and establishes two large maximum levels to control the investments' exposure: a limit on country risk and issuer risk. The country risk limits are set based on an internal qualification scale and are measured as percentages of the Bank's equity or as absolute amounts. The guideline includes approval schemes and attributions for new limits or increases on existing limits.

Compliance with this guideline is monitored on a daily basis through the Investment Portfolio Management and Control Module (MACCI from Spanish), an internal tool to document the entire investment process, including new approvals, limit increases or decreases, purchases and sales, and also to control exposures by the issuer and the use of assigned quotas.

The Board of Directors has delegated the responsibility of managing credit risk to the Credit Committee and Assets and Liabilities Committee (ALICO); both periodically monitor the financial condition of the respective debtors and issuers that represent a credit risk for The Bank.

Information on the portfolio's quality

Quality of the portfolio of bank deposits and securities under resale agreements
The Bank maintains deposits in banks for \$4,424,361,368 as of December 31, 2022 (2021: \$4,368,390,784). Deposits are maintained at central banks and other financial institutions, most of which have A+ to CCC+ risk ratings, (2021: A+ to CC risk ratings) based on Standard & Poor's, Moody's, and/or Fitch Ratings. Of total deposits, excluding deposits in central banks, as of December 31, 2022, approximately \$4 million did not have a risk rating (2021: \$10 million).

Securities under resale agreements are mostly classified based on the ratings assigned by Standard & Poor's, Moody's, and/or Fitch Ratings.

As of December 31, 2022, all securities under resale agreements and bank deposits are up to date on the payment of principal and interest.

Quality of the investments in securities

The Bank segregates the investment portfolio into investments at FVPL, investments at FVOCI, and investments at AC. As of December 31, 2022, investments amounted to \$4,190,431,132 (2021: \$3,513,667,154).

Investments at FVLP
 The credit quality of investments is monitored according to the international risk rating of the issuer provided by Standard & Poor's, Moody's, and/or Fitch Ratings

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

Guarantees and other improvements to reduce credit risk and its financial effect

The Bank maintains guarantees and other improvements to reduce credit risk to ensure the payment of their financial assets exposed to credit risk. The types of mortgage guarantees include residential and commercial, buildings and land. The types of collateral include private vehicles, commercial use, leasing, machinery and other equipment.

The table below shows the main types of guarantees taken with respect to different types of financial assets.

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The table below shows the portfolio and identifiable value of collateral (primarily commercial properties) backing the loan. For each loan, the corresponding value of its guarantees is capped by the guaranteed nominal amount:

| | 202 | 22 | 2021 | | |
|---------------|---------------|----------------|---------------|----------------|--|
| | Loans | Covered amount | Loans | Covered amount | |
| Corporates | | · | · | | |
| Stage 1 and 2 | 3,820,785,517 | 3,800,416,102 | 3,555,849,372 | 3,528,360,224 | |
| Stage 3 | 165,068,999 | 164,978,703 | 179,902,682 | 179,463,822 | |
| Total | 3,985,854,516 | 3,965,394,805 | 3,735,752,054 | 3,707,824,046 | |

The following are the non-financial assets that the Bank seized as collaterals to secure collection during the period.

| | <u>2022</u> | <u>2021</u> |
|-------------------------|-------------|-------------|
| Properties | 21,925,214 | 17,349,020 |
| Furniture and equipment | 4,723,279 | 952,289 |
| Others | 0 | 636,585 |
| Total | 26,648,493 | 18,937,894 |

The Bank's policy is to perform the sale of these assets to cover the balances due. Using non-financial assets for its operations is not a Bank policy.

Residential mortgage loans

The following table shows the index of loans from the mortgage portfolio to the value of collaterals LTV is calculated as a percentage of the gross amount of the loan in relation to the value of collaterals. The gross amount of the loan excludes any loss impairment. The value of collaterals for mortgages is based on the original value of the guarantee as of the date of disbursement. The corresponding values are updated based on requirements of local regulators, new disbursements with the same guarantee, credit restructuring or judicial processes that involve execution.

ECL allowance

Projection of future conditions

The upside, central and downside scenarios are described below, along with the main risks taken into consideration to define them.

External sector:

| External risk | Upside | Central | Downside |
|--|--|---|--|
| Slowdown of commercial partners: Less dynamism is expected in developed economies; important commercial partners for the region. | Monetary policies are effective in controlling inflation and moderation is achieved without generating considerable distortions on economies globally. | Economic growth is affected by the contractionary interest rate cycle. Developed economies are slowing but growth remains positive. | Economic growth is considerably affected by policies to contain inflation. It results in significant levels of unemployment and growth is negative in several quarters of the year in developed countries. |
| Global financial volatility: With the contractionary cycle (in terms of monetary policies) financial volatility and risk aversion have increased, which is expected to reduce capital flows to emerging economies. | 2) Political tensions in the world are eased, specifically with the Russia-Ukraine conflict, which generates confidence in international markets and lower inflationary pressures on commodities. Supply chains reach normality. | 2) To control inflation and prevent another inflationary spike, the FED raises or maintains interest rates resulting in tighter international financial conditions. | 2) Inflation remains persistent and monetary authorities must further increase their reference rates. Political/military conflicts persist and worsen generating uncertainty in international markets. |

The scenarios for each country are detailed below:

| Scenario | Scenarios synthesis | Upside | Central | Downside |
|-----------|---|--|---|--|
| Guatemala | Production maintains robust growth trend through 2022 Macro prices are considered stable, considering the recent macroeconomic stability, with controlled inflation, stable exchange rate, stable rates and low level of sovereign debt. | Low level of government debt allows for financial stability and expansionary policy, maintaining support during 2022. Rapid recovery of the external sector and trade partners drive economic growth above expectations. | Economic growth slows downs but remains positive. Macroeconomic conditions remain stable and inflationary pressures ease for inflation to moderate. | Slow vaccination process and manifestation of environmental risks result in lower economic growth. |
| Honduras | 1. The trend of rapid recovery of the product during 2022 is maintained, reaching this year to recover the levels of product of 2019, after a sharp drop (Sars-Cov2 and hurricanes). 2. Macro prices are considered stable, considering the fiscal discipline that the government has had and recent macroeconomic history, with inflation in the target range, exchange rate stability and stable interest rates. | Elections are held in a transparent manner and the winning candidate strengthens institutional confidence, favors growth and maintains stability in prices and interest rates. | Economy loses dynamism, but remains in positive territory. Fiscal indicators improve considerably and inflation moderates. | Climate vulnerability once again has an impact on production. |

BAC INTERNATIONAL BANK, INC., AND SUBSIDIARIES (Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

| Scenario | Scenarios synthesis | Upside | Central | Downside |
|----------------|--|---|---|--|
| EI Salvador | 1. Economic growth in 2021 was higher than expected, with a rapid recovery to the output levels of 2019. Financial stress could limit in 2022. 2. The inflation outlook will be increased with respect to the scenarios defined in September, in line with the increase in the last months of history. An increase in interest rates is contemplated, with the increase in the financial vulnerability of the government. | External economic growth above expectations, favoring higher income from remittances. Government proposes effective measures to balance budget and reduce financial vulnerability. | Economic growth decreases compared to 2021 due to tighter international financial conditions due to government financing needs. | Faster-than-expected rises in international rates increase pressures on rates and hinder access to government financing. |
| Nicaragua | 1. In 2021 Nicaragua had growth in the product and recovered above the levels of 2019 prior to the pandemic. Even so, it remains below the 2017 level, prior to the sociopolitical crisis, a level that would be reached during 2023. Modest economic growth is expected for 2022, due to the deterioration in political conditions since 2018. 2. The inflation outlook was increased, considering the recent increase in the price level. It is expected that the foreign exchange policy of minidevaluations and interest rate increases will be maintained, considering the possibility of reducing external sources of financing for the government. | The country is benefiting from external economic growth. Sanctions by trading partners do not affect international trade and allow the country to benefit from external growth. | The democratic deterioration of 2021 is maintained however, the sociopolitical crisis does not intensify, resulting in modest economic growth. | without economic growth and with higher rates, |
| Costa Rica | Growth remains stable and the economy recovers during 2022. Inflation is expected to remain in the upper half of the target range, with the possibility of exceeding it in the pessimistic scenario. A lower devaluation is expected than in 2021 and stability in interest rates. | Improvement in public finances, institutional strength, with transparent elections and advances in vaccination result in higher-than-expected growth and stability in interest rates. | Government advances in agreement with the IMF, with the objective of balancing its finances, which results in stability in economic growth, inflation in the target range and gradual increase in rates, in line with increases by the FED. | Political agreements are not reached to reduce the fiscal deficit, uncertainty generates exchange rate pressures and an increase in the demand for loanable funds from the government puts pressure on interest rates. |
| Panama | Panama's economic growth remains the highest among Central American countries. Regarding the last review, scenarios of higher inflation during 2022 and a gradual increase in interest rates are contemplated, in line with the rate trend in the United States. | Panama is favored by external economic growth above expectations, with fewer obstacles to international trade. | Government investment projects will support the base scenario of economic growth with improved productivity. | The deterioration in government finances continues and there is a greater increase in the debt, which further pressures prices and affects economic growth. |

| | | | 20 | 21 | | |
|--------------------------------|-----------|----------|-------------|-----------|------------|--------|
| Scenario probability weighting | Guatemala | Honduras | El Salvador | Nicaragua | Costa Rica | Panama |
| Upside | 35% | 25% | 10% | 20% | 20% | 25% |
| Central | 55% | 60% | 60% | 55% | 65% | 60% |
| Downside | 10% | 15% | 30% | 25% | 15% | 15% |

Periodically, the Bank carries out stress testing of more extreme shocks to calibrate its determination of the upside and downside representative scenarios. A comprehensive review is performed at least annually on the design of the scenarios, advised by at least one external economist.

The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

The key drivers for credit risk for loans' portfolios are: Monthly Economic Activity Index, Consumer Price Index, Exchange Rate, Local Currency Interest Rate and Dollars Interest Rate.

The Bank estimates each key driver for credit risk over the active forecast period of one year.

Sensitivity of ECL to future economic conditions

The ECL are sensitive to judgements and assumptions made regarding formulation of forward-looking scenarios and how such scenarios are incorporated into the calculations. Management performs a sensitivity analysis on the ECL recognized on material classes of its assets.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The table below shows the loss allowance on loans assuming each forward-looking scenario (e.g. central, upside and downside) were weighted 100% instead of applying scenario probability weights across the three scenarios, shown in note 3 (c).

Notes to the Consolidated Financial Statements

(4) Risk Management, continued Modified Financial Assets

The following table provides information on individually significant financial assets that were modified while having a provision for losses measured in an amount equal to the ECL for the expected life.

| | <u>2022</u> | <u>2021</u> |
|------------------------------------|-------------------|-------------|
| Amortized cost before modification | 23,121,321 | 73,326,881 |
| Net loss due modification | <u>21,523,686</u> | 325,909 |
| Total | 44,645,007 | 73,652,790 |

Concentration of credit risk

The Bank follow-up the concentration of credit risk by sector and geographic location. The geographic location of loans and deposits in banks is based on the location of the debtor. In regard to investments, they are based on the location of the issuer. The analysis of the concentration of credit risks as of the date of the consolidated financial statements is as follows:

| | | | | 2022 | | | |
|-------------------------|-----------------------------------|----------------------------|----------------------------|-----------------------------|-------------------------|------------------------|----------------------|
| _ | | | Securities purchased | | | | |

Since April 2018, the Republic of Nicaragua has been facing a series of socio-political events that have economic implications that are affecting the development of activities in the productive sectors of the country. The Bank has been and will continue to monitor the evolution of the liquidity and the quality of the portfolio of financial instruments placed or acquired in that country, in order to mitigate and manage the impacts of this situation.

(b) Liquidity Risk

Liquidity risk is defined as the contingency of not being able to comply fully, in a timely and efficient manner, the expected and unexpected cash flows, current and future, without affecting the course of daily operations or the financial condition of the entity. This contingency (liquidity risk) is evidenced in the insufficient liquid assets available for this and/or the need to assume unusual funding costs.

The liquidity management conducted by the Bank seeks to meet its obligations of (i) withdrawals of deposits by its customers, (ii) repayment of the service of its debts of institutional funding according to maturity and the payment scheme scheduled, and (iii) compliance with the credit demand and investment funds according to the requirements. In this regard, the Bank has constant control over its short-term liabilities and assets. The

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

liquidity of the Bank is carefully managed and adjusted daily based on the estimated liquidity in a contingent and expected scenario.

The Bank's liquidity management is in compliance with the policies and guidelines issued by Senior management and/or Regional and Local Board of Directors; the regulators of each country in which it operates and the contractual obligations. These best practices are primarily defensive, in the sense of seeking to maintain appropriate levels of liquidity at all times. In addition, the Bank has implemented the internal liquidity requirements that force it to keep excesses on regulatory requirements.

Specifically, the Bank's liquidity risk is managed through the calculation of liquidity coverage indicators in the short term, net of obligations and requirements, and in normal and stressful situations, as well as a stress model of liquidity based on the cash flow, which considers the activity of assets and liabilities in a time horizon of up to one year, under a variety of scenarios, which include both normal market conditions and more severe conditions. In addition, the Bank seeks to maintain a term matching, which enables it to meet its financial obligations over time.

As in the market risk, Senior Management engages actively in liquidity risk management through regional and local Assets and Liabilities Committee (ALICO) and Comprehensive Risk Management; thus giving greater support to the strategic decision-making process. The liquidity risk assumed by the Bank is in line with the structure, complexity, size and nature of its operation, while always respecting the local regulations, the regional guidelines and the guidelines issued by Senior Management and/or Regional and Local Board of Directors.

At the level of the entire Bank is established the obligation of properly documenting the periodic assessment of measurement indicators and compliance with regional guidelines and local regulations is established; as well as ensuring that reports related to liquidity risk to be remitted to the different internal and external instances (including the regulator) are adequate in terms of content, quality of information, generation, transmission and validation according to the requirements set forth in the respective standards.

The following table shows the results of the ratios for high-quality liquidity coverage with respect to the outflow of deposits under normal and stressful conditions, calculated based on internal policies, reported as of the reporting date and during the year:

| <u>% of Liqui</u> 2022 | <u>2021</u> |
|---------------------------|----------------------|
| 32.1 | 33.4 |
| 35.4 | 44.4 |
| 31.8 | 36.6 |
| 26.9 | 31.6 |
| | 32.1 35.4 31.8 |

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

As of December 31, 2022, and 2021, the Banking operations of the Bank comply with the liquidity requirements established by the regulators.

Quantitative information

The following table details the undiscounted cash flows of financial liabilities and financial assets, and disbursements due to financial derivatives in contractual maturity groups from the remaining period from the date of the consolidated statement of financial position:

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The Bank's expected cash flows on some financial assets and financial liabilities vary significantly from the contractual cash flows. The main differences are the following:

- customer demand deposits are expected to remain stable or increase;
- not all unrecognized loan commitments are expected to be withdrawn immediately; and
- retail mortgage loans have an original contractual maturity of between 20 and 30 years, but an expected average maturity of eight years because customers take advantage of early repayment options.

The liquidity of the Bank is measured and monitored on a daily basis by the Treasury of each country. In addition, the Bank maintains appropriate levels of cash in vaults, deposits in banks and short-term deposits which constitutes the Bank's basis of liquidity reserves. The composition of liquidity is shown in the following table:

| | <u>2022</u> | <u>2021</u> |
|---|----------------------|---------------|
| Cash and cash equivalents | 768,898,974 | 741,723,863 |

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

(c) Market risk

Market risks are those that may result in losses as a result of adverse price movements in the financial markets where positions are maintained. It comprises the following risks:

- Interest rate risk: is the possibility of an economic loss due to adverse variations in interest rates.
- Exchange rate risk: is the possibility of an economic loss due to adverse variations in the exchange rate.

The main objectives of the Bank's corporate governance structure include supervising the performance of the management team in each country, ensuring the proper functioning of the internal control system, monitoring the exposure to risks and managing them effectively. For such purpose, management engages actively in market risk management through the regional and local Assets and Liabilities Committees (ALICO) and the Comprehensive Risk Management Committee; thus, giving greater support to the strategic decision-making process.

Market risks assumed by the Bank are in line with the structure, complexity, size and nature of its operation, while always respecting the local regulations, the regional guidelines and the guidelines issued by management and/or regional and local board of directors.

The Bank establishes the requirement of properly documenting the periodic assessment of measurement indicators and compliance with regional guidelines and local regulations, as well as ensuring that reports related to market risk to be remitted to the different internal and external instances (including the regulator) are adequate in terms of the content, quality of information, generation, transmission and validation according to the requirements set forth in the respective standards.

For the measurement, control and management of market risk, the Bank uses the indicators required by the regulator of each country as well as another set of indicators established in the internal regional guideline, which are calculated by country and in a consolidated manner based on internal sources of information.

Exchange risk is measured through the determination of the equity percentage that is not dollarized (also known as monetary position). The main objective of the policy is to establish that the difference between assets denominated in US dollars and liabilities denominated in US dollars is at least equal to equity, which is equivalent to having a 100% dollarized equity. However, due to regulatory restrictions applicable in each country that limit the position in US dollars, the consolidated monetary position may be below this desirable limit.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

Reform of benchmark interest rates

In March 2021, the Financial Conduct Authority (FCA), as the regulator of ICE (the authorized administrator of LIBOR), announced that after December 31, 2021, LIBOR settings for US dollars for a week and two months will no longer be provided or will no longer be representative. The remaining US dollar settings will either cease to be provided or no longer be representative after June 30, 2023.

A fundamental overhaul of the world's major interest rate benchmarks is underway, replacing some Interbank Offered Rates (IBORs) with alternative near-risk-free rates (referred to as "IBORs" reform). The Bank has significant exposure to LIBOR on its financial instruments, which are being reformed as part of these market initiatives.

The main risks to which the Bank has been exposed as a result of the IBOR reform are operational. For example, the renegotiation of loan contracts through bilateral negotiation with corporate clients, updating of contractual terms in corporate and consumer clients, updating of systems that use IBOR curves and review of operational controls related to reform and regulatory risks. Financial risk is predominantly limited to interest rate risk.

The Bank established a multifunctional IBOR Committee to manage its transition to alternative reference rates. The objectives of the IBOR Committee include assessing whether financial assets and/or liabilities should be amended as a result of IBOR reform, and how to manage communication about IBOR reform with counterparties. The IBOR Committee reports to the Executive Committee on a regular basis and collaborates with other business functions as needed. Additionally, it provides periodic reports to ALICO and the treasuries on the Bank's operations to support interest rate risk management and works closely with the Comprehensive Operational Risk Committee to identify the operational and regulatory risks arising from the reform of the IBOR.

For contracts indexed to an IBOR that expire after the expected cessation of the IBOR rate, the IBOR Committee has established policies to modify the contractual terms. These amendments include the addition of fallback clauses in the contracts that determine the applicable rate or calculation mechanism once the reference IBOR rate is not published or the replacement of the rate IBOR with an alternative reference rate.

The Bank has been applying a policy to manage that consumer loans, such as mortgages, personal loans, and vehicles, are modified in a uniform manner, and tailored products, such as corporate loans, are modified in bilateral negotiations with counterparties.

The Bank's Executive Committee approved a policy requiring that, beginning in the first half of 2021, all newly originated variable rate loans to clients incorporate fallback clauses for when an IBOR ceases to exist. The provisions of these clauses provide for a transition to the applicable alternative benchmark rate, which varies by jurisdiction.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The Bank monitors the progress of the transition from IBOR to new reference rates by reviewing the total amounts of contracts that have yet to transition to an alternative reference rate and the amount of such contracts that include an adequate fallback clause. The Bank considers that a contract has not yet transitioned to an alternative reference rate (and is known as an "unreformed contract") when the interest under the contract is indexed to a reference rate that is still subject to IBOR reform, even if it includes a fallback clause that deals with the cessation of IBOR.

As of December 31, 2022, the reform of the IBOR on the operations in which the Bank has exposure has not been completed. The following table sets forth the IBOR rates to which the Bank has exposure, the main benchmark rates to which these exposures have been or are being transferred, and the status of the transition:

| References IBOR prior to transition | Reference after transition | <u>2022</u> | <u>2021</u> |
|-------------------------------------|--|--|--|
| USD LIBOR – 1 months | New York Prime Rate / TERM SOFR | Finalized | In progress |

The Bank ceased to originate loan operations referenced to LIBOR rates in the fourth quarter of 2021. Also, it has initiated the modification of financial asset contracts associated with the LIBOR rate and incorporated fallback clauses in some existing contracts. Likewise, it temporarily opted to originate loan operations based on the New York Prime Rate.

In the medium term, the Bank expects to originate loan operations referenced to the TERM SOFR, published by the Chicago Mercantile Exchange (CME). The Bank opted for this rate in light of the recommendation made to the market by the Alternative Reference Rates Committee, a technical entity made up of different market participants and regulators to lead this transition process. The Bank constantly monitors the TERM SOFR, and estimates to migrate and/or originate loan operations with reference to said rate before June 2023.

The following tables show the amounts of unreformed financial assets and those with appropriate fallback clauses as of December 31, 2022 and 2021. The amounts of investment securities are shown at their book values and the amounts of loans are shown at their gross book values.

Based on the above, the Bank calculates the total exposure of the consolidated statement of financial position to interest rate risk. The Bank states that the interest rate risk should be measured for each currency in which assets and liabilities are maintained.

Interest rate risk is analyzed based on the gap analysis, in order to approximate the change in equity of the Bank's consolidated statement of financial position and in the net income from interest from eventual changes in market interest rates. The economic value of an instrument involves an assessment of the current value of its expected net cash flows, discounted to reflect market rates. By extension, the economic value of a financial entity can be seen as the present value of expected net cash flows from the entity, defined as expected cash flows from assets less expected cash flows from liabilities. In this sense, the perspective of economic value reflects a view of the sensitivity of the financial entity net value to interest rate fluctuations.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The estimate of the impact of variations in interest rates is conducted under a scenario of increase or decrease of 100 basis points in assets and liabilities at the different terms (parallel movement of the curve). The following table presents a summary of the impact on the Bank's economic value and on the net interest income applying these variations:

| | Increase of 100 bps (1) | Decrease of 100 bps (1) |
|---|--|--|
| Impact on equity to interest rate movements 2022 Average for the year Maximum for the year Minimum for the year | (57,546,906) (63,825,989) (75,126,821) (55,007,284) | 57,546,906 63,825,989 75,126,821 55,007,284 |
| 2021 Average for the year Maximum for the year Minimum for the year | (58,484,257) (9,552,464) 21,752,386 (60,673,814) | 58,484,257 9,552,464 (21,752,386) 60,673,814 |
| Impact on net income from interests 2022 Average for the year Maximum for the year Minimum for the year | 81,399,435 71,747,677 81,749,291 65,915,385 | (81,399,435) (71,747,677) (81,749,291) (65,915,385) |
| 2021 Average for the year Maximum for the year Minimum for the year | 67,764,403 68,441,969 72,492,083 61,477,531 | (67,764,403) (68,441,969) (72,492,083) (61,477,531) |

⁽¹⁾ According to the nature of the instruments on demand, the sensitivity of annual income and expenses to a decrease or increase in rates for currencies with rates below 1% is measured using a variation of 25 basis points.

(d) Operational risk

The Bank has established a minimum framework for operational risk management within its companies, which is intended to provide general guidelines to ensure the identification, assessment, control, monitoring and reporting of operational risks and materialized events that may affect the organization with the objective of ensuring the proper management, mitigation or reduction of the managed risks and contributing to provide a reasonable assurance with respect to the achievement of organizational objectives.

The operational risk management model considers best practices issued by the Basel Committee on Banking Supervision and by COSO (Committee of Sponsoring Organizations of the Treadway Commission). In addition, it complies with the regulatory requirements of the region, which have been defined by the regulators of the countries where the Bank operates.

Based on the above, operational risk is defined as the possibility that the events resulting from personnel, information technologies or inadequate or failed internal processes, or produced by external causes, generate negative impacts that go against the objectives. By its nature, it is present in all of the organization's activities.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(4) Risk Management, continued

The priority of the Bank is, therefore, identifying and managing the major risk factors, regardless of whether they can produce monetary losses. The measurement also contributes to the establishment of priorities in the management of operational risk.

The operational risk management system is properly documented in the Operational Risk Guideline and Manual. It is a continuous process with several stages:

- Measurement of the perspective of control environment
- · Identification and assessment of operational risks
- Treatment and mitigation of operational risks
- Risk monitoring and review
- Registration and accounting of losses due to operational risk incidents

Additionally, the Bank has policies formally established for the management of information security, business continuity, fraud prevention and code of ethics that support the proper management of operational risks in the organization.

At the regional level and in all countries where the Bank operates, there is an operational risk management unit that monitors, advises and assesses the management conducted by the administration with regard to operational risks. In addition, there is a specialized Operational Risk Committee (OR Committee) composed of senior management. The OR Committee reports to the Comprehensive Risk Management Committee, monitors management and ensures that identified operational risks are kept at accepted levels by the organization.

Compliance with Bank standards is supported by a program of periodic reviews undertaken by Internal Audit, which reports the results to the Internal Audit Committee of each entity where the Bank operates.

(5) Critical Accounting Estimates and Judgments in the Implementation of Accounting Policies

The Bank's management is responsible for the development, selection, disclosure of policies and critical accounting estimates and their implementation in a manner consistent with the assumptions selected and related to the significant estimate uncertainties.

Loan Impairment Losses

The Bank reviews its loan portfolio to assess the impairment at least on a quarterly basis. When determining whether an impairment loss should be recorded in profit or loss, the Bank's makes decisions as to whether observable information exists indicating that there is a measurable reduction in estimated future cash flows from a loan portfolio before such reduction may be identified with an individual loan in that portfolio. This evidence includes observable information indicating that an adverse change in the payment condition of borrowers in a group, national or local economic conditions that correlate with non-compliance instances in Bank's assets have occurred.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(5) Critical Accounting Estimates and Judgments in the Implementation of Accounting Policies, continued

Fair Value of Financial Instruments

Fair value of financial instruments that are not quoted in active markets is determined using valuation techniques. All models are evaluated and adjusted before use, and the models are calibrated to ensure that the results reflect current information and comparative market prices.

To the extent possible, models only use observable information; however, areas such as credit risk (own and by the counterparty), volatilities and correlations require estimates by management. Changes in assumptions about these factors may affect the reported fair value of financial instruments.

Impairment of Investments at FVOCI

In debt instruments the impairment may be appropriate when there is evidence of impairment in the financial health of the issuer, industry or sector performance, changes in technology, and operational and financial cash flows.

Goodwill Impairment

The Bank will determine whether goodwill is impaired annually or when there is indication of possible impairment.

This requires an estimate of the value in use of CGUs to which the goodwill value is attributed. The estimate of the value in use requires management to consider the expected cash flows from CGUs and also the selection of an appropriate discount rate to calculate the current value of such cash flows.

Income Tax

The Bank uses the asset and liability method to record income tax. Under this method, the deferred tax assets and liabilities are recognized by the estimates of future tax consequences attributable to temporary differences between the amounts of assets and liabilities in the consolidated financial statements and their respective tax bases and due to accumulated tax losses. The deferred tax assets and liabilities are valued using the enacted tax rates that are expected to be applied to the tax revenue for the years in which they are expected to be recovered or temporary differences are settled. The effect on deferred tax assets and liabilities by a change in tax rates is recognized in the operation results in the year in which the

liabilities by a change in tax rates is recognized in the operation results in the year in which the change occurs.

Management regularly assesses the realization of deferred tax assets for its recognition. Management evaluates whether it is more likely than not that a portion or all deferred tax assets are not realizable.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(6) Cash, Cash Equivalents and Deposits

Cash and cash equivalents are listed below for reconciliation purposes with the consolidated statement of cash flow:

| | <u>2022</u> | <u>2021</u> |
|---|----------------------|---------------|
| Cash and cash equivalents | 768,898,974 | 741,723,863 |

Notes to the Consolidated Financial Statements

(9) Loans, continued

The net value of the financial lease's receivable is presented below:

| | <u>2022</u> | <u>2021</u> |
|---|--------------------|--------------------|
| Minimum lagge payments receivable | 437.718.025 | 345.863.707 |
| Minimum lease payments receivable | - , -,- | ,, - |
| Less: unearned interest | <u>7,601,067</u> | <u>6,009,817</u> |
| Minimum lease payments receivable, net | 430,116,958 | 339,853,890 |
| Less: allowance for loss in leases | 11,328,562 | 10,905,560 |
| Less: net deferred commissions | <u>5,569,441</u> | 3,907,172 |
| Net value of investment in finance leases | <u>413,218,955</u> | <u>325,041,158</u> |

The following table summarizes the minimum lease payments receivable as of December 31, 2022:

| Year ended December 31 | |
|------------------------|-------------|
| 2023 | 92,361,527 |
| 2024 | 88,717,691 |
| 2025 | 83,150,518 |
| 2026 | 69,241,036 |
| 2027 and thereafter | 96,646,186 |
| | 430.116.958 |

(10) Property and Equipment

The movement of property and equipment as of December 31, 2022, is summarized as follows:

| | | | | 2022 | | | |
|--|---|--|--|--|---|--|---|

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(10) Property and Equipment, continued

During the year 2022, the Bank made a net transfer between companies for \$296,714, and a net transfer of furniture and equipment for a net amount of \$154,457 to intangible assets.

During 2021, the Bank made a net intercompany transfer of \$40,218, and a net transfer of property and equipment of \$6,484 to intangible assets.

(11) Goodwill and Intangible Assets

Changes in the carrying value of goodwill are as follows:

| | 2022 | 2021 |
|------------------------------|----------------|-------------|
| Goodwill | | |
| Balance on January 1, | 333,709,271 | 334,084,274 |
| Foreign currency translation | <u>595,176</u> | (375,003) |
| Balance on December 31 | 334,304,447 | 333,709,271 |

As of December 31, 2022, and 2021 no impairment in the cash-generating units has been recorded. The fair value of the cash-generating units exceeds the carrying amount plus goodwill; therefore, no impairment loss was recorded.

The recoverable amounts of the CGUs of the Bank have been calculated based on their value in use.

The value in use of the CGUs is determined by discounting the future cash flows expected to be generated from the continuing use of each unit.

Calculation of value in use is based on the following basic assumptions:

| | <u>2022</u> | <u>2021</u> |
|-----------------------|-------------|-------------|
| Average discount rate | 14.0% | 11.5% |
| Growth rate | 3.0% | 3.0% |

The discount rate after taxes used to discount the dividend flows reflects the specific risks relating to the CGUs and has been estimated considering the risk profile of each of the different markets in which the Bank operates.

A 10-year projection was carried out, considering that once this period has passed, the maturity of the businesses and the consequent stabilization of the cash flows will be achieved. Macroeconomic and business assumptions were also used for each of the countries where it operates, in order to reflect the reality that each market provides to all CGUs.

When estimating the terminal value, the normalized flow of funds has been projected in perpetuity, adjusted in accordance with the growth expectations. This projection does not exceed the average long-term growth rate for the economy in each of the countries in which the Bank operates; for this reason, an average annual long-term growth rate of 3.0% was estimated (2021: 3.0%).

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(11) Goodwill and Intangible Assets, continued

The main assumptions described above may change as economic and market conditions change. The Bank estimates that the reasonably possible changes in these assumptions do not affect the recoverable amount of the CGUs or that they decrease below the CGUs carrying values.

The gross balance of the carrying amount and the accumulated amortization for each intangible asset acquired by the Bank subject to amortization as of December 31, 2022, is presented below:

| | | | 1,292,271,146 | 16,792,113 | 1,395,965,230 | 21,324,493 |

BIB Merchant Voucher Receivables Limited (SPV) issued financial obligations subscribed by international holders secured by the collection rights of accounts receivable, which are generated in transactions in affiliated businesses and processed by the Bank, with credit cards issued with the Visa and MasterCard brands in Panama. The obligations have an average original duration of 7 years. Principal repayments of the 2017-1 and 2018-1 obligations will be paid through Citibank N.A., beginning in January 2021 and January 2022, respectively. As of December 31, 2022, the weighted average duration of the certificates is 2.44 years and 2.98 years, respectively.

BIB Central American Card Receivables Limited (SPV) issued financial obligations subscribed by international holders guaranteed by the collection rights of accounts receivable, which are generated in transactions in affiliated businesses and processed by the Bank, with credit cards issued by international financial institutions, with the Visa and MasterCard brands in Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua, as well as the American Express brand for those countries and Panama; with an average original duration of 7 years. Principal repayments of the 2019-1 obligation will be paid through Citibank N.A., beginning in October 2023. As of December 31, 2022, the weighted average duration of the certificates is 4.25 years.

The collection rights of the accounts receivable were assigned by BAC International Bank Inc. to the SPV's, and the SPV's invested the amount received for the notes issued in fixed-term certificates of deposits in BAC International Bank Inc.

(Panama, Republic of Panama)

As of December 31, 2022, the carrying amount of the principal issued by BAC San José DPR Funding Limited, a special purpose vehicle (hereinafter SPV), amounted to \$150,000,000 (2021: \$150,000,000), corresponding to the 2020-1 series with a balance of \$150,000,000. The origination costs pending amortization of the certificates amounted to \$1,872,261 as of December 31, 2022 (2021: \$2,190,702). The notes issued by the SPV are secured by current and future Diversified Payment Rights denominated in US dollars, originated by a subsidiary of the Bank and sold to the SVP. Series 2020-1 obligations pay interest in February, May, August and November of each year at a fixed interest rate of 3.70%. The notes have an original average duration of 5.58 years. As of December 31, 2022, the weighted average duration of the notes is 3.55 years.

The Bank has had no defaults of principal, interest or other contractual clauses concerning its financial obligations.

(15) Other Financial Obligations

The Bank has placed, through its subsidiaries and through the stock markets of Costa Rica, El Salvador, Honduras and Panama, debt certificates with fixed and variable rates, which are described below:

| | 20 | 22 | 2021 | | |
|--------------------------------------|-----------------|-----------------|-----------------|-----------------|--|
| Payable in: | Interest rate | Carrying amount | Interest rate | Carrying amount | |
| US dollars | 2.00% to 10.00% | 718,653,466 | 2.83% to 10.00% | 676,310,068 | |

(20) Income from Financial Instruments, Net

Income from financial instruments, net, included in the consolidated statement of profit or loss is summarized below:

| | <u>2022</u> | <u>2021</u> |
|--|-------------|-------------|
| Net income from the sale of investments at FVOCI | 11,029,929 | 62,013,643 |
| Unrealized net gains from securities at FVPL | (2,512,832) | 499,158 |
| Unrealized net gains from securities at FVPL | 3,500,675 | 6,300,758 |
| Net fair value gains on derivative financial instruments | _1,978,384 | 271,972 |
| • | 13 996 156 | 69 085 531 |

(21) Services Charges

The services' charges segregated according to their nature, are detailed below.

| | <u>2022</u> | <u>2021</u> |
|---|-------------|-------------|
| Consumer and corporate banking services | 436,226,445 | 375,938,733 |
| Asset management | 20,191,775 | 20,223,436 |
| Investment banking services | 4,438,454 | 6,251,392 |
| | 460,856,674 | 402,413,561 |

Income from fees and commissions from contracts with clients is measured based on the consideration specified in a contract with a client. The Bank recognizes revenue when it transfers control over a service to a customer.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(21) Services Charges, continued

The following table provides information about the nature and timing of the satisfaction of performance obligations in contracts with customers, including significant payment terms, and the related revenue recognition policies.

| Type of service | Nature and timing of satisfaction of performance obligations, including significant payment terms | Revenue recognition under IFRS 15 |
|-----------------------------------|--|---|
| Personal and Corporate Banking | The Bank provides banking services to retail and corporate customers, including account management, provision of overdraft facilities, foreign currency transactions, credit card and servicing fees. Fees for ongoing account management are charged to the customer's account on a monthly basis. The Bank sets the rates separately for retail and corporate banking customers in each jurisdiction on an annual basis. Transaction-based fees for interchange, foreign currency transactions and overdrafts are charged to the customer's account when the transaction takes place. Servicing fees are charged on a monthly basis and are based on fixed rates reviewed annually by the Bank. | Revenue from account service and servicing fees is recognized over time as the services are provided. Revenue related to transactions is recognized at the point in time when the transaction takes place. |
| Investment Banking Service | The Bank's investment banking segment provides various finance-related services, including loan administration and agency services, administration of a loan syndication, execution of client transactions with exchanges and securities underwriting. Fees for ongoing services are charged annually at the end of the calendar year to the customer's account. However, if a customer terminates the contract before 31 December, then on termination it is charged the fee for the services performed to date. Transaction-based fees for administration of a loan syndication, execution of transactions, and securities underwriting are charged when the transaction takes place. | Revenue from administrative agency services is recognized over time as the services are provided. The amounts to be collected from customers on 31 December are recognized as trade receivables. Revenue related to transactions is recognized at the point in time when the transaction takes place. |
| Asset Management | The Bank provides asset management services. Fees for asset management services are calculated based on a fixed percentage of the value of assets managed and deducted from the customer's account balance on a monthly basis. In addition, the Bank charges a nonrefundable up-front fee when opening an account. | Revenue from asset management services is recognized over time as the services are provided. Non-refundable up-front fees give rise to material rights for future services and are recognized as revenue over the period for which a customer is expected to continue receiving asset management services. |

Notes to the Consolidated Financial Statements

(25) Income Taxes, continued

The Bank's management performed offsetting of the deferred tax assets and liabilities that derive from income tax corresponding to the same tax jurisdiction in the consolidated statement of financial position.

As of December 31, 2022, the Bank has incurred in net operating tax loss carry forwards of \$9,234,503 (2021: \$9,117,324), which are available to offset future taxable income of the applicable subsidiaries. The net operating losses begin to prescribe in 2030 and through 2036.

As of December 31, 2022, the Bank has not recognized a deferred income tax liability of approximately \$231,655,598 for undistributed earnings from foreign subsidiaries operations, because the Bank believes that \$2,536,635,644 of these profits will be reinvested for an indefinite period.

The Bank's earnings are taxed in various jurisdictions. As of December 31, 2022, the Bank had unrecognized tax positions for \$657,567 (2021: \$6,394,242). Interest expense and penalties related to income tax liabilities and recognized as part of income tax expenses for the year ended December 31, 2022 amounted to (\$7.983,696) (2021: \$18,850,868)). As of December 31, 2022, total interest and penalties expenses included in other liabilities amounted to \$614,890 (2021: \$3,375,635).

As of December 31, 2022, the Bank maintains an effective tax rate of 30.5% (2021: 23.7%).

The following are the tax jurisdictions in which the Bank and its affiliates operate and the latest tax year subject to examination: United States of America: 2019, Guatemala: 2019, El Salvador: 2019, Honduras: 2018 Nicaragua: 2019, Costa Rica: 2019 and Panama: 2020.

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include, principally, commitments to extend credit, financial guarantees and letters of credit, the balances of which are not reflected in the accompanying consolidated balance sheets.

Letters of credit are conditional commitments issued by the Bank to guarantee performance of a customer to a third party. Those letters of credit are primarily used to support trade transactions and borrowing arrangements. Generally, all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments may expire without being drawn upon; therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on management's credit evaluation of the customer.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(26) Off-Balance Financial Instruments with Risk and Other Commitments

As of December 31, 2022, the Bank had outstanding revolving available to its credit card customers in each of the various countries of operation that ranged from approximately \$432 million to \$3,761, million (2021: from \$378 million to \$2,951 million). The unused portion of the total amount available in each country, aggregated approximately from \$311 million to \$2,764 million (2021: from \$276 million to \$2,225 million). While these amounts represented the available lines of credit to customers per country, the Bank has experienced, and does not anticipate, that all of its customers will exercise their entire available lines at any given point in time.

The Bank generally has the right to increase, reduce, cancel, alter or amend the terms of these available lines of credit at any time.

Financial guarantees are used in various transactions to enhance the credit standing of the Bank's customers. They represent irrevocable assurances that the Bank will make payment in the event that the customer fails to fulfill its obligations to third parties.

The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. As of December 31, 2022 outstanding letters of credit and financial guarantees are as follows:

| | <u>2022</u> | <u>2021</u> |
|--------------------------------|-------------|-------------|
| Stand-by letters of credit | 189,165,870 | 160,945,882 |
| Commercial letters of credit | 34,907,083 | 66,067,869 |
| Financial guarantees | 456,937,880 | 439,432,789 |
| Commitments and guarantees (1) | 61,751,083 | 65,367,721 |
| | 742,761,916 | 731,814,261 |
| | | |

⁽¹⁾ Includes commercial and mortgage payment promise letter

The nature, terms and maximum potential amount of future payments the Bank could be required to make under the standby letters of credit and guarantees as of December 31, 2022, are detailed as follows:

| | <u>2022</u> | <u>2021</u> |
|--------------|-------------|-------------|
| Up to 1 year | 619,107,950 | 543,193,334 |
| Over 1 year | 88,746,883 | 122,553,058 |
| • | 707 854 833 | 665 746 392 |

Generally, the Bank has resources to recover from clients the amounts paid under these guarantees; additionally, the Bank can hold cash or other collateral to cover for these guarantees. As of December 31, 2022, the assets held as collateral, that the Bank can obtain and liquidate to recover totally or partially the amounts paid under guarantees amounted to \$109,644,085 (2021: \$73,539,142).

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(27) Disclosures on the Fair Value of Financial Instruments

The Bank established a process for determining the fair value. The fair value is primarily based on quoted market prices, when available. If market prices or quotes are not available, fair value is determined based on internally developed models that primarily use market information or other information obtained as inputs regardless of market parameters, including but not limited to yield curves, interest rates, debt prices, foreign exchange rates and credit curves. However, in situations where there is little or no market activity for the asset or liability at the measurement date, the fair value measurement reflects the Bank's own judgments about assumptions that market participants would use in setting the price of the asset or liability

The judgments are developed by the Bank based on the best information available in the circumstances, including expected cash flows, discount rates adjusted for risks and the availability of observable and unobservable inputs.

The methods described above can generate fair value estimates that may not be indicative of the net realizable value or that do not reflect future values. In addition, while the Bank believes its valuation methods are appropriate and consistent with those used by other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in different fair value estimates as of the reporting date.

Recurring Fair Value Measurement

The following is a description of the valuation methodologies used to value instruments carried at fair value, including a general classification of such instruments according to the fair value hierarchy.

Securities

When there are market prices in an active market, securities are classified in Level 1 of the fair value hierarchy. Level 1 securities include highly liquid bonds from the government and agencies and investments in highly traded shares.

If market prices are not available for a specific security, the fair value is determined using market prices of securities with similar characteristics or discounted cash flows and are classified in Level 2. In certain cases where there is limited activity or less transparency in determining the assumptions used in the valuation, securities are classified in Level 3 of the fair value hierarchy.

Therefore, when valuing certain debt obligations, determining fair value may require comparisons with similar instruments or default and collection rate analysis.

The Bank's accounting policies include the recognition of transfers between the levels of the fair value hierarchy on the date of the event or change in the circumstances that caused the transfer.

As of December 31, 2022, there were no transfers between levels.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(27) Disclosures on the Fair Value of Financial Instruments, continued

The table below includes the movement of the figures in the consolidated balance sheet (including changes in fair value) of the financial instruments classified by the Bank within Level 3 of the fair value hierarchy, for the period ended December 31, 2022. When determining whether to classify an instrument in Level 3, the decision is based on the importance of unobservable assumptions within the overall fair value measurement.

| | Investments |
|---------------------------------------|--------------------------|
| | Common |
| <u>2022</u> | stocks |
| Assets | |
| Fair value at January 01, 2022 | 12,147,983 |
| Valuation of investments at FVPL | 948,216 |
| Foreign currency translation | (17,397) |
| Fair value at December 31, 2022 | 13,078,802 |
| | |
| | Investments |
| | Investments Common |
| <u>2021</u> | |
| 2021 Assets | Common |
| | Common |
| Assets | Common stocks |
| Assets Fair value at January 01, 2021 | Common stocks 10,460,656 |

The table below describes the valuation techniques and input data used in the financial instruments' recurring fair value measurements:

| Financial instrument | Valuation technique and entry data used | Level |
|---|---|-------|
| Corporate bonds and government and agencies bonds | Consensus prices obtained from price providers (Bloomberg). For part of these instruments the Bank applies cash flows discounted using a market rate of an instrument with a similar remaining maturity. Market prices of suppliers or local regulators in markets with lower marketability. Discounted cash flows are used for various bonds using a market rate of an instrument with a similar remaining maturity. | (2,3) |
| Common stocks | Discounted cash flow using capital cost rate adjusted for size premium. | (3) |
| Common stocks | Market prices provided by local stock exchanges. | (2) |
| Mutual funds and other stocks | Net Asset Value. | (2) |
| Embedded financial derivative instruments | Functional currency cash flows Foreign currency cash flows | (3) |

Fair Value of Financial Instruments, Additional Disclosures

A description of the methods and assumptions used to estimate the fair value of the main financial instruments held by the Bank is provided below:

Financial instruments with carrying amounts that approach the fair value:

Cash and cash equivalents, deposits that bear interest and clients' obligations for acceptances and acceptances outstanding are measured at book value reported in the consolidated balance sheet, which is considered a reasonable fair value estimate due to the characteristics and maturity of these instruments.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(27) Disclosures on the Fair Value of Financial Instruments, continued

Loans

To determine the fair value of the loan portfolio, the cash flows were discounted at a rate that reflects:

- a. actual market rate, and
- b. future interest rate expectations, for a term that reflects the anticipated payments on the loan portfolio.

Deposits

To determine the fair value of these instruments, the cash flows were discounted at a rate that reflects:

- a. Actual market rate, and
- b. Future interest rate expectations, for the remaining term of these instruments.

Securities sold under repurchase agreements

There are no market price quotes for these instruments; therefore, their fair value is determined using discounted cash flow techniques. Cash flows are estimated based on the contractual terms, considering any incorporated derivative characteristic or other factors. Expected cash flows are discounted using market rates that approach the maturity of the instrument, as well as the nature and amount of the guarantee given or received.

Borrowings

The fair value is estimated based on current interest rates for debt with similar and adjusted maturities to reflect the credit rating of the Bank and its guarantees.

Other borrowed funds

Fair value is estimated based on the market price quotes for the same issuance or similar issuances or on the current rates offered by the Bank for debts with the same terms, adjusted for credit quality.

Below are described the valuation techniques and significant unobservable input data used in determining the fair value of recurring and nonrecurring assets and liabilities categorized within Level 3 of the fair value hierarchy that are recognized in the consolidated balance sheet:

| 2022 | Fair value | Valuation technique | Quantitative information of Level 3 fa Unobservable assumptions | <u>ir values</u> <u>Range (weighted average)</u> |
|---------------|-------------------|-----------------------|--|---|
| Common stocks | 15,220,127 | Discounted cash flows | Increase annual rate | 10% - 15% |
| <u>2021</u> | <u>Fair value</u> | Valuation technique | Quantitative information of Level 3 fa Unobservable assumptions | ir values Range (weighted average) |
| Common stocks | 14,227,193 | Discounted cash flows | Increase annual rate | 10% - 15% |

Notes to the Consolidated Financial Statements

(30) Segments information

The Bank segregates its operations according to each of the countries in which it operates ("Operating Groups"). Each operating group offers similar products and services, and they are managed separately based on the Bank's internal reporting and management structure. The Bank's Administration reviews the internal management reports of each operating group at least once a month.

The information related to each operation group is presented below. The segment's profit before taxes, as included in the internal management reports reviewed by the Bank's Management, is used to measure performance because management considers that this information is the most relevant for evaluating the results of the respective groups of companies. operation in relation to other entities operating within the industry.

Notes to the Consolidated Financial Statements

(31) Litigations

As of December 31, 2022, the Bank maintains litigation against various kinds, which are not material when evaluated individually and collectively. These litigations are in the process of resolution and would not represent a significant effect on the consolidated financial statements of the Bank in the event of an adverse result.

(32) Regulatory Aspects

The Bank's banking operations are subject to various regulatory requirements managed by the government agencies of the countries in which it operates or has a license. Failure to comply with these regulatory requirements can lead to certain mandatory actions and possibly additional discretionary actions by the regulators that, if performed, could have a significant effect on The Bank's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework of prompt corrective actions, the Bank's banking operations must comply with specific capital guidelines that provide for the quantitative asset measurements and certain elements out of the consolidated balance sheet, in accordance with the regulatory accounting practices. The amounts of capital of the Bank's banking operations and their classification are subject to qualitative judgments by the regulators about their components, risk weightings and other factors.

As December 31, 2022, the Banking operations of the Bank meet all capital adequacy minimum requirements to which they are subject, which varies from 8.00% to 12.00% and other regulatory requirements.

Main Laws and Regulations applicable for banking operations in the Republic of Panama regulated and supervised by the Superintendency of Banks of the Republic of Panama:

- Director's Board General Resolution SBP-GJD-003-2013 issued by the Superintendency of July 9, 2013.

This Resolution establishes that in the event that the calculation of a provision or reserve in accordance with prudential rules applicable to banks, which present specific aspects in addition to those required by IFRS, is greater than the respective calculation determined under IFRS, over-provision or reserve under prudential rules will be recognized in a wealth regulatory reserve.

Agreement No. 4-2013 "By which provisions are established on the management and administration of credit risk inherent in the letter of credit and off-balance sheet transactions", issued by the Superintendency on May 28, 2013.

- Among other aspects, this Agreement defines the classification categories for credit facilities for specific and dynamic provisions, as well as the criteria that policies for restructured loans, acceptance of guarantees and punishment of operations. Specific impairment provisions of the loan portfolio should be determined and recognized in the financial statements according to the classification of credit facilities in the risk categories currently in use, according to certain weightings of calculations set out in the Agreement and considering certain percentages of minimum provisions per category.
- Dynamic provisions, as a prudential regulatory criterion, will be determined and recognized quarterly as wealth reserves following certain calculation criteria and restrictions that will be gradually applied.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(32) Regulatory Aspects, continued

The table below summarizes the classification of the amortized cost loan portfolio and the reserves for loan losses based on Agreement No. 4-2013, as of December 31, 2022

| | | Omenial | 2022 | ! | | |
|---|--|---|---|--|---|---|

Agreement No. 4-2013 defines as default any credit facility that presents any amount not paid, by principal, interest or expenses agreed contractually, with an age of more than 30 days and up to 90 days, from the date established for the compliance with payments.

Agreement No. 4-2013 defines as an overdue any credit facility whose non-payment of contractually agreed amounts is more than 90 days old. This period shall be calculated from the date set for the payment to be made. Transactions with a single payment at maturity and overdrafts will be considered due when the age of the non-payment exceeds 30 days, from the date on which the payment obligation is established.

As of December 31, 2022, the classification of the amortized cost loan portfolio by maturity profile based on Agreement No. 4-2013:

| | | 202 | 2 | |
|---|---------------------------------|--------------------|--------------------|-------------------------------|

Based on Agreement No. 8-2014, for regulatory purposes, interest recognition as income based on the days of arrears in payment to principal and/or interest and the type of credit transaction is suspended operationally as follows:

- a) For consumer and business credits, if there is a default of more than 90 days; and
- b) For home mortgage loans, if there is a default of more than 120 days.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(32) Regulatory Aspects, continued

Total loans from BAC International Bank, Inc. ("Parent Bank"), As of December 31, 2022 in non-interest calculation status amounts to \$172,719,922 (2021: \$109,481,736). Total unrecognized interest as income on these loans is \$15,950,374 (2021: \$5,884,950).

Article 1 of Agreement No.11-2019 amends Article 27 of Agreement No. 004-2013 as follows:

Article 27. Write-offs: Each bank shall write off all loans classified as unrecoverable within a period of no more than one year from the date on which it was classified in this category. The following loans shall be exempt from the application of this period:

Mortgage loans, consumer loans with real estate guarantees and corporate loans with real estate guarantees, classified as risk mitigators in accordance with Article 42 of Agreement No. 11-2019 and whose guarantee is found duly constituted in the Republic of Panama in favor of the Bank. In these cases, each bank will write off all loans classified as unrecoverable within a period of no more than two years, from the date on which it was classified in this category. The above provision may be extended only once for an additional year upon approval by the Superintendent.

After the year of extension, if the Bank has not yet made any write off, it must create a reservation in the equity account, by appropriating its retained earnings to which the net loan value of the provisions will be charged already constituted, according to the percentages set out in the following table:

| | <u>Loans</u> | <u>Period</u> | Applicable percentage |
|---|---|--|--------------------------|
| _ | Mortgage loans and consumer loans with real estate guarantees | At the beginning of the first year after the extension (fourth year) | 50% |
| | | At the beginning of the first year after the extension (fourth year) | 50% |
| | Corporate loans with real estate guarantees | At the beginning of the third year | 50% |
| | | At the beginning of the fourth year | 50% |

As of December 31, 2022, and 2021, the Bank constituted an estate provision of \$8,878,613 and \$8,542,731, respectively, pursuant to Agreement No. 11-2019.

As of December 31, 2022, in compliance with the provisions set out in Articles 36 and 38 of Agreement No. 4-2013, the Bank established a dynamic provision with a balance of \$245,340,957 (2021: \$245,340,957), is allocated from retained profits. The credit balance of this dynamic provision is part of the regulatory capital but does not replace or compensate the requirements for the minimum percentage of capital adequacy established by the Superintendency of Banks of Panama.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(32) Regulatory Aspects, continued

Agreement No. 4-2013 establishes a dynamic reserve which shall not be less than 1.25%, nor more than 2.50% of the risk-weighted assets corresponding to credit facilities classified as normal, as of December 31, 2022. These percentages represent the following amounts:

| | <u>2022</u> | <u>2021</u> |
|-------|-------------|-------------|
| 1.25% | 205,284,368 | 180,538,744 |
| 2.50% | 410,568,736 | 361,077,489 |

The following table is the calculation of the dynamic reserve, at the consolidated level:

| | 2022 | <u>2021</u> |
|---|-----------------------------|-----------------------------|
| Component 1 Risk – weighted assets (credit facilities – Normal category) For alpha coefficient (1.50%) | 16,422,749,428 | 14,443,099,557 |
| Result Component 2 | 246,341,241 | 216,646,493 |
| Variation (positive) between the current quarter versus the previous risk – weighted assets For beta coefficient (5.00%) Result | 810,770,386 | 606,198,737 |
| t onent 3 | 40,538,519 | 30,309,937 |
| Amount of change in the balance of specific provisions in the quarter Gross dynamic reserve balance Plus: | 6,324,534 280,555,226 | (10,329,743) 236,626,687 |
| Amount restriction as set forth in paragraphs "a" and "b" of Article 37 and consolidation effect. Net dynamic reserve balance | (35,214,269) 245,340,957 | (11,945,216) 245,340,957 |

As of December 31, 2022, and 2021, the Bank did not register an excess regulatory credit reserve based on Agreement No. 4-2013.

- Capital Management

Banking law in Panama states that general license banks must maintain a minimum paid or allocated capital of \$10 million; and a minimum capital adequacy rate of 8% of its risk-weighted assets, which should include off-balance sheet operations.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts of Total Capital and Primary Capital (Pillar 1) on risk-weighted assets. Management considers that, as of December 31, 2022, and December 31, 2022, the Bank meets all the financial adequacy requirements to which it is subject.

The Bank presents its consolidated capital funds on its risk-weighted assets based on Agreements No.1-2015, No.3-2016, No.2-2018 and No.11-2018 of the Superintendency of Banks of Panama.

Agreement No.1-2015, which lays down capital adequacy rules for banks and banking groups, began to govern on 1 January 2016.

Agreement No.3-2016, which lays down rules for the determination of assets weighted by credit risks and counterparty risk, began to govern on 1 July 2016.

Agreement No.2-2018, which lays down the provisions on liquidity risk management and the short-term liquidity hedging ratio, began to govern on 1 January 2020.

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(32) Regulatory Aspects, continued

Agreement No.11-2018, by which new provisions on Operational Risks are issued, began to govern on September 30, 2020.

Resolution SBP-GJD-005-2020, established special measures in relation to article 2 of Agreement No. 3- 2016, in order to temporarily modify the risk weights of the different categories of assets used to calculate the capital index, by virtue of the current situation that is being experienced at the national level as a result of COVID-19. It became effective on April 20, 2020.

Agreement No. 9-2020, which establish additional, exceptional, and temporary measures are issued to comply with the provisions contained in Agreement No. 4-2013, became effective on September 21, 2020.

The Bank did not require establishing additional reserves to comply with Agreement 9-2020.

The Bank presents consolidated capital funds on its weighted assets based on risks, in accordance with the requirements of the Superintendency of Banks of Panama, which are detailed below:

| | <u>2022</u> | <u>2021</u> |
|---|-------------------------|------------------|
| Ordinary Primary Capital (Pilar I) | | |
| Common stocks | 834,708,000 | 834,708,000 |
| Additional paid in capital | 140,897,488 | 140,897,488 |
| Retained earnings | 2,346,577,551 | 1,913,341,660 |
| Non-controlling interest | 273,006 | 246,432 |

| Filliary Capital Ratio | <u>_11.40%</u> | <u>_11.40%</u> |

(Panama, Republic of Panama)

Notes to the Consolidated Financial Statements

(32) Regulatory Aspects, continued

- Liquidity Ratio

The percentage of the liquidity index reported by BAC International Bank, Inc. ("Parent Bank") to the regulatory body, under the parameters of Agreement No. 4-2008, as of December 31, 2022, was 45.67% (2021: 53.94%).

- Assets Held for sale

Agreement No. 3-2009 issued by the Superintendency of Banks of Panama, by which the provisions on disposal of property are updated, sets a five (5) years period to dispose of property acquired in settlement of unpaid loans.

The awarded properties held for sale are recognized at the lowest value between the carrying value of non-cancelled loans or the estimated value of realization of the properties. The agreement provides that the provision of the awarded properties, allocated of the non-distributed profits, is progressively within a range of 10% from the first year of registration up to 90% to the fifth year of award, through the establishment of a heritage reserve. The following is the progressive booking table:

| <u>Years</u> | Minimum Reserve <u>Percentage</u> |
|--------------|--------------------------------------|
| First | 10% |
| Second | 20% |
| Third | 35% |
| Fourth | 15% |
| Fifth | 10% |

As of December 31, 2022, the Bank constituted provision of the awarded properties amounting to \$5,291,493 (2021: \$4,300,122), as a property item that is allocated from undistributed profits.

- Financial Bank Act

The operations of financial companies in Panama are regulated by the Directorate of Financial Enterprises of the Ministry of Trade and Industry in accordance with the laws established in Law No.42 of 23 July 2001.

- Lease Acts

Leasing operations in Panama are regulated by the Directorate of Financial Enterprises of the Ministry of Trade and Industry in accordance with the legislation established by the Act No.7 of July 10, 1990.

- Securities Act

The stock market operations in Panama are regulated by the Superintendency of the Securities Market in accordance with the legislation established in Decree Law No.1 of 8 July 1999, reformed by Law No. 67 of September 1, 2011.

The broker firm's operations are regulated by Agreement No. 4-2011, modified in certain aspects by the Agreements No. 8-2013 and No. 3-2015, issued by the Superintendency of the Securities. The Agreements specifies that broker firms must comply with capital adequacy requirements and its modalities.
